A global focus on the demand side of the energy equation has never been more important. Supply uncertainty, high prices and urgent climate targets all point to the value of energy efficiency and energy savings. Governments are responding with various measures including targeted grants and demand-reduction campaigns. At the IEA's recent 7th Annual Global Conference on Energy Efficiency, energy ministers from around the world agreed that "energy efficiency and demand side action have a particularly important role to play now as global energy prices are high and volatile, hurting households, industries and entire economies" and called on "all governments, industry, enterprises and stakeholders to strengthen their action on energy efficiency."

Well-designed campaigns can motivate people to reduce their energy use. For example, in the United States, some estimates suggest that up to 20% of home energy demand could potentially be saved from behavioural changes in the residential sector. One estimate for India suggests the potential for energy savings through behavioural adjustments to be in the range of 3.4 to 10.2 TWh per year by 2030. The IEA's 2021 report *The Potential of Behavioural Interventions for Optimising Energy Use at Home* shows that campaigns can achieve a wide range of
