J. H. C. Williams

Beyond The Fragments:

Beyond the Fragments Sheila Rowbotham, Lynne Segal, Hilary Wainwright, 1979 This is the most sustained argument for a reappraisal on the left of all its traditions that has yet come out of the women's movement in Britain It is written by three women who have been active in both feminist and socialist politics Whether from the experience of Leninist organizations or of libertarian politics each writer analyses the problems and contradictions of her own political background The women's movement not only suggests different ways of organizing for socialist politics but also critically questions the way the left has integrated the insights of the women's movement and confronted its own reproduction of authoritarian and hierarchical structures The authors argue not just for a rhetorical acceptance of feminism but for a redefinition of priorities a new approach theory and consciousness and for an open and searching examination of past and present forms of political organizations They do not offer any answers indeed their distinct concerns and emphases would make that impossible but instead hope that their ideas will be discussed amongst socialist and feminists involved in a wide range of activities and hope that through their effort people will be encouraged to speak their mind and communicate their understanding Back cover

Williams, 2001-07-12 Throughout the middle and late Republican periods fourth to first centuries BC the Romans lived in fear and loathing of the Gauls of northern Italy caused primarily by their collective historical memory of the destruction of the city of Rome by Gauls in 387 BC By examining the literary evidence relating to the historical ethnographic and geographic writings of Greeks and Romans of the period focusing on invasion and conflict this book attempts to answer the questions how and why the Gauls became the deadly enemy of the Romans Dr Williams also examines the problematic notion of the Gauls as Celts which has been so influential in historical and archaeological accounts of northern Italy in the late pre Roman Iron Age by modern scholars The book concludes that ancient literary evidence and modern ethnic presumptions about Celts are not a sound basis for reconstructing either the history of the Romans interaction with the peoples of northern Italy or for interpreting the material evidence *Chambers's Encyclopaedia*, 1883 *Transactions of the Section on Surgery of the American Medical Association at the ...
