*Beyond the Threshold* Christopher M. Moreman, 2008-09-18 An overview of beliefs in an afterlife from major world religions Ancient conceptions Judaism Christianity Islam Hinduism Buddhism Chinese religions An overview of the research into experiences of an afterlife Mediumship Apparitions and hauntings Near death and out of the body experiences Past life memories Beliefs and experiences an attempt at a synthesis Comparison of beliefs Comparison of phenomena Ghosts, ESP, and Beyond SREEKUMAR V T, 2025-02-27 Embark on a riveting journey into the mysterious and unexplored realms of the human psyche with Ghosts ESP and Beyond Navigating the World of Parapsychology This captivating book serves as your guide through the intricate landscapes of paranormal phenomena from ghostly encounters to the untapped potentials of extrasensory perception ESP Expertly crafted by seasoned authors this comprehensive exploration invites readers to navigate the enigmatic world of parapsychology challenging preconceptions and unlocking the secrets that lie beyond the boundaries of ordinary perception Whether you're a sceptic a believer or simply intrigued by the unknown this book promises an immersive odyssey into the extraordinary Join us as we peel back the layers of reality and venture into the uncharted territories where the seen and the unseen converge Fruits of Anthroposophy George Kaufmann, 1922 Lord Lytton's Miscellaneous Works Edward Bulwer Lytton Baron Lytton, 1875 Statistics with Posterior Probability and a PHC Curve Hideki Toyoda, 2024-06-14 This textbook reconstructs the statistics curriculum from the perspective of posterior probability In recent years there have been several reports that the results of studies using significant tests cannot be reproduced It is a problem called a reproducibility crisis For example suppose we could reject the null hypothesis that the average number of days to recovery in patients who took a new drug was the same as that in the control group However rejecting the null hypothesis is only a necessary condition for the new drug to be effective Even if the necessary conditions are met it does not necessarily mean that the new drug is effective In fact there are many cases where the effect is not reproduced Sufficient conditions should be presented such as the average number of days until recovery in patients who take new drugs is sufficiently short compared to the control group evaluated from a medical point of view without paying attention to necessary conditions This book reconstructs statistics from the perspective of PHC i.e. probability that a research hypothesis is correct For example the PHC curve shows the posterior probability that the statement The average number of days until recovery for patients taking a new drug is at least days shorter than that of the control group is correct as a function of Using the PHC curve makes it possible to discuss the sufficient conditions rather than the necessary conditions for being an efficient treatment The value of statistical research should be evaluated with concrete indicators such as 90% probability of being at least 3 days shorter not abstract metrics like the p value *The Red Horizon* Evangeline Ryves, 1913 **The Theosophical Forum**, 1896 How Children Learn Frank Nugent Freeman, 1917 *Brown v.
