**Teaching Collection (Anthropology)** ,1990 **The Heavenly Writing** Francesca Rochberg,2004-09-27 In antiquity the expertise of the Babylonians in matters of the heavens was legendary and the roots of both western astronomy and astrology are traceable in cuneiform tablets going back to the second and first millennia BC The Heavenly Writing first published in 2004 discusses the place of Babylonian celestial divination horoscopy and astronomy in Mesopotamian intellectual culture Focusing chiefly on celestial divination and horoscopes it traces the emergence of personal astrology from the tradition of celestial divination and the use of astronomical methods in horoscopes It further takes up the historiographical and philosophical issue of the nature of these Mesopotamian celestial sciences by examining elements traditionally of concern to the philosophy of science without sacrificing the ancient methods goals and interests to a modern image of science This book will be of particular interest to those concerned with the early history of science Law, laity

and solidarities Pauline Stafford,Janet L. Nelson,Jane Martindale,2020-01-03 The primary focus of this collection by leading medieval historians is the laity in particular the ideas and ideals of lay people The contributors explore lay attitudes as expressed in legal cases charters chronicles and collective activities Highlights the centrality of kinship whilst stressing its limitations as an all purpose social bond Ranges chronologically and geographically from the seventh century to the eve of the Reformation from Western Britain to papal and urban Italy from Carolingian dynastic politics to the decline of medieval pilgrimage in the sixteenth century and from the courts of twelfth century France to the fifteenth century wards of London

another history of the dance in ancient Greece but wants to lay the groundwork on which such a history should properly be build The three preliminary studies offered here are first an extensive historiography of the subject which seeks to illuminate where we stand at present in reference to the large amount of work done on ancient Greek dance for the past 500 years Secondly an exercise in source criticism embracing both texts and imagery in order to establish the limits to which we can push any investigation and thirdly an attempt at model building to provide an explicit theoretical framework for future research This is the first time that some of the approaches of the new dance scholarship which has arisen during the past few

decades have been systematically applied to the dancing of the ancient world

**Writing the History of the Mind** Cristina Chimisso, 2016-02-11

For much of the twentieth century French intellectual life was dominated by theoreticians and historians of mentalit. Traditionally the study of the mind and of its limits and capabilities was the domain of philosophy however in the first decades of the twentieth century practitioners of the emergent human and social sciences were increasingly competing with philosophers in this field ethnologists sociologists psychologists and historians of science were all claiming to study how people think. Scholars including Gaston Bachelard Georges Canguilhem L on Brunschvicg Lucien L vy Bruhl Lucien Febvre Abel Rey Alexandre Koyr and H l ne Metzger were all investigating the mind historically and participating in shared research projects. Yet as they have since been appropriated by the different disciplines literature on their findings has so far failed to recognise the connections between their research and their importance in intellectual history. In this exemplary book Cristina Chimisso reconstructs the world of these intellectuals and the key debates in the philosophy of mind particularly between those who studied specific mentalities by employing prevalently historical and philological methods and those who thought it possible to write a history of the mind outlining the evolution of ways of thinking that had produced the modern mentality. Dr Chimisso situates the key French scholars in their historical context and shows how their ideas and agendas were indissolubly linked with their social and institutional positions such as their political and religious allegiances their status in academia and their familial situation. The author employs a vast range of original research using philosophical and scientific texts as well as archive documents correspondence and seminar minutes from the period covered to recreate the milieu in which these relatively neglected scholars made advances in the history of philosophy and science and produced

□□□□, 1994      **The Philosophical Review**, 1992      **Ideas and Solidarities of the Medieval Laity** Susan Reynolds, 1995

This book contains essays written over the past 25 years about medieval urban communities and about the loyalties and beliefs of medieval lay people in general. Most writing about medieval religious political legal and social ideas starts from treatises written by academics and assumes that ideas trickled down from the clergy to the laity. Susan Reynolds whether writing about the struggles for liberty of small English towns the national solidarities of the Anglo Saxons or the capacity of medieval peasants to formulate their own attitudes to religion rejects this assumption. She suggests that the medieval laity had ideas of their own that deserve to be taken seriously

*Theology and the New Histories* Gary Macy, 1999

In this collection of essays members of the College Theology Society explore how Christianity as an historical religion is responding to the challenge of multiple readings of history. The many new ways of writing history women s history history written from the perspective of minority groups new sources of history including those that are non Western and deconstructivist history pose challenges to the assumptions of traditional theology. They also affect our understanding of the history of Christianity and of the development of Christian doctrine

*Barbarous Philosophers* Christopher Coker, 2010 This is not a book about philosophy and war It is a book on contemporary conflict in which the author invokes philosophy to help understand the problems that we face in fighting war today *Barbarous Philosophers* sets out to discuss the nature of war through the work of sixteen philosophers from Heraclitus in the sixth century BC to the philosopher physicist Werner Heisenberg writing in the 1950s Each section begins with a brief epigram representative of each writer s thinking The contention of the book is that war as opposed to warfare is largely an invention of philosophy our reflection on organised collective violence that date from the time we emerged from the hunter gatherer stage of development and created the first civilisations centred around city life The Greek philosophers were the first to invent what Pascal called the rules of war and in representing the nature of war they also influenced how it was conducted to the extent that generals allowed their minds to be shaped over time by the work of philosophy The purpose of philosophy writes Herbert Simon is to understand meaningful simplicity in the midst of disorderly complexity Behind the flux of everyday life there is an ordered existence which it is the task of philosophy to uncover if it can Behind the ever changing character of war lies its nature that needs to be grasped if it is to be waged successfully
