Deutsch-englisches Lexikon. 2. U. Verb. Aufl Christian Ludwig, 1745 Buried City, Unearthing Teufelsberg Benedict Anderson, 2017-07-06 Cities are built over the remnants of their past buried beneath their present We build on what has been built before whether over foundations formalising previous permanency or over the temporal occupations of ground But what happens when you shift a city when you dislodge its occupation of ground towards a new ground bury it and forget it Focusing on Berlin's destruction during World War II and its reconstruction after the end of the war this book offers a rethinking of how the practices of destruction and burial combine to reform the city through geography and how burying a city is intricately tied to forgetting destruction ruination and trauma Created from 25 million cubic meters of rubble produced during World War II Teufelsberg Devil's Mountain is the exemplar of the destroyed city Its critical journey is chronicled in combination with Berlin's seven other rubble hills and their connections to constructing forgetting through burial Furthermore the book investigates Berlin's sublime relation to Albert Speer's urban vision to rival the ancient cities of Rome and Athens through their now shared geographies of seven hills Finally there is a central focus on the role of the citizens who cleared Berlin's streets of rubble and the subsequent human relationships between people and ruins This book is valuable reading for those interested in Architectural Theory Urban Geography Modern History and Urban Design
