## Doctors At Risk:

Engineering Risk and Finance Charles S. Tapiero, 2013-02-13 Risk models are models of uncertainty engineered for some purposes They are educated guesses and hypotheses assessed and valued in terms of well defined future states and their consequences They are engineered to predict to manage countable and accountable futures and to provide a frame of reference within which we may believe that uncertainty is tamed Quantitative statistical tools are used to reconcile our information experience and other knowledge with hypotheses that both serve as the foundation of risk models and also value and price risk Risk models are therefore common to most professions each with its own methods and techniques based on their needs experience and a wisdom accrued over long periods of time This book provides a broad and interdisciplinary foundation to engineering risks and to their financial valuation and pricing Risk models applied in industry and business health care safety the environment and regulation are used to highlight their variety while financial valuation techniques are used to assess their financial consequences This book is technically accessible to all readers and students with a basic background in probability and statistics with 3 chapters devoted to introduce their elements Principles of risk measurement valuation and financial pricing as well as the economics of uncertainty are outlined in 5 chapters with numerous examples and applications New results extending classical models such as the CCAPM are presented providing insights to assess the risks and their price in an interconnected dependent and strategic economic environment In an environment departing from the fundamental assumptions we make regarding financial markets the book provides a strategic game like approach to assess the risk and the opportunities that such an environment implies To control these risks a strategic control approach is developed that recognizes that many risks resulting by what we do as well as what others do In particular we address the strategic and statistical control of compliance in large financial institutions confronted increasingly with a complex and far more extensive regulation

*Creating Your Birth Plan* Marsden Wagner, 2006 Helps expectant mothers make informed decisions about their pregnancy and childbirth furnishing information on what to expect when delivering in a hospital birthing center or at home how to select an advocate the natural stages of labor natural alternatives to drugs surgery and technology and explanations of various medical interventions Original 25 000 first printing

**Patients at Risk** Rebekah Bernard, 2023 When you experience a medical emergency you expect to be treated by a licensed physician with expertise in your condition But what happens when you look up from your hospital gurney to find that the doctor has been replaced by a non physician practitioner with just a fraction of the training and experience From the co author of *Patients at Risk The Rise of the Nurse Practitioner and Physician Assistant in Healthcare* the first book to warn about the systematic replacement of physicians comes *Patients at Risk Imposter Doctors* an even more frightening expos of patient endangerment at the hands of for profit corporate entities and healthcare conglomerates In the two years since *Patients at Risk* debuted the use of nonphysician practitioners has skyrocketed Employment of nurse practitioners is projected to grow by 40% and physician

assistants by 28% in the next ten years At the same time the employment of physicians and surgeons is projected to grow just 3% In other words if you haven't already been treated by a nonphysician practitioner instead of a physician you soon will be The disproportionate growth in healthcare providers reflects thirty years of U S healthcare policy as influenced by nonphysician lobbyists and corporate strategists While corporations and government agencies argue that they have been forced to hire nurse practitioners and physician assistants due to a supposed physician shortage the truth is far more sinister Physicians are being systematically fired and replaced by lesser trained clinicians for one simple reason to make money Advocates for nonphysician practice claim that there is no need for concern because nurse practitioners and physician assistants are just as good as physicians They are wrong Despite over fifty years of scientific analysis of the care provided by nonphysicians there is no conclusive evidence that nonphysician practitioners can provide safe and effective medical care without physician oversight In fact new studies have shown the opposite that the replacement of physicians puts patients at risk The book *Imposter Doctors* exposes the dangers of a healthcare system that increasingly prioritizes profits over patient care The only cure for today's healthcare crisis is for patients to become informed about who is providing their care They must know the difference in training and education and they must demand answers from those who would deprive them of physician led care

*Burnout-Free Working* Richard Duggins, 2025-04-21 Are you keen to banish burnout for good *Burnout Free Working* is written by Dr Richard Duggins a leading expert and trainer on preventing burnout in high stress jobs also known as *The Doctor's Doctor* In this book he reveals the secrets of his trade for the first time With a wealth of proven tools for burnout free working Dr Duggins covers all you need to know including Spotting early signs of burnout Steering clear of the burnout cliff Tackling Keep calm and carry on culture Detoxifying workplace environments Dealing with trauma at work Moving from Stress to Decompress Strategies to support colleagues Dr Duggins breaks down common burnout myths it's really not about building resilience and encourages us all to shift our thinking away from burnout recovery to instead living and working in a way that avoids burnout before you even get close

*Getting Incentives Right* Robert D. Cooter, Ariel Porat, 2016-12-13 How tort contract and restitution law can be reformed to better serve the social good Lawyers judges and scholars have long debated whether incentives in tort contract and restitution law effectively promote the welfare of society If these incentives were ideal tort law would reduce the cost and frequency of accidents contract law would lubricate transactions and restitution law would encourage people to benefit others Unfortunately the incentives in these laws lead to too many injuries too little contractual cooperation and too few unrequested benefits *Getting Incentives Right* explains how law might better serve the social good In tort law Robert Cooter and Ariel Porat propose that all foreseeable risks should be included when setting standards of care and awarding damages Failure to do so causes accidents that better legal incentives would avoid In contract law they show that making a promise often causes the person who receives it to change behavior and undermine the cooperation between the parties They recommend several solutions including a novel contract called anti

insurance In restitution law people who convey unrequested benefits to others are seldom entitled to compensation Restitution law should compensate them more than it currently does so that they will provide more unrequested benefits In these three areas of law Getting Incentives Right demonstrates that better law can promote the well being of people by providing better incentives for the private regulation of conduct

**Abuse of the Doctor-Patient Relationship** Fiona Subotsky, Susan Bewley, Michael Crowe, 2010-11 The doctor patient relationship is fraught with risk Patients may be at risk from a doctor who misuses their position of authority or is unclear where the appropriate boundaries lie Doctors risk disciplinary or criminal proceedings when this happens This book aims to address these risks to assist clinicians in their daily relationships with patients and to improve patient safety The authors examine the ethical principles and how these may be taught prevalence of abuse regulation and sanctions management and governance remediation and the roles of the different organisations that may be involved such as the General Medical Council and medical protection societies This is a practical guide to help clinicians avoid boundary violations and improve patient safety

**Medicine, Money, and Morals** Marc A. Rodwin, 1995-04-20 Conflicts of interest are rampant in the American medical community Today it is not uncommon for doctors to refer patients to clinics or labs in which they have a financial interest 40% of physicians in Florida invest in medical centers for hospitals to offer incentives to physicians who refer patients a practice that can lead to unnecessary hospitalization or for drug companies to provide lucrative give aways to entice doctors to use their brand name drugs which are much more expensive than generic drugs In *Medicine Money and Morals* Marc A Rodwin draws on his own experience as a health lawyer and his research in health ethics law and policy to reveal how financial conflicts of interest can and do negatively affect the quality of patient care He shows that the problem has become worse over the last century and provides many actual examples of how doctors decisions are influenced by financial considerations We learn how two California physicians for example resumed referrals to Pasadena General Hospital only after the hospital started paying 70 per patient their referrals grew from 14 in one month to 82 in the next As Rodwin writes incentives such as this can inhibit a doctor from taking action when a hospital fails to provide proper service and may also lead to the unnecessary hospitalization of patients We also learn of a Wyeth Ayerst Labs promotion in which physicians who started patients on INDERAL a drug for high blood pressure angina and migraines received 1000 mileage points on American Airlines for each patient studies show that promotions such as this have a direct effect on a doctor s choice of drug Rodwin reveals why the medical community has failed to regulate conflicts of interest peer review has little authority state licensing boards are usually ignorant of abuses and the AMA code of ethics has historically been recommended rather than required He examines what can be learned from the way society has coped with the conflicts of interest of other professionals lawyers government officials and businessmen

all of which are held to higher standards of accountability than doctors And he recommends that efforts be made to prohibit and regulate certain kinds of activity such as kickbacks and self referrals to monitor and regulate conduct and to provide penalties for improper conduct Our failure to face physicians conflicts of interest has distorted the way medicine is practiced compromised the loyalty of doctors to patients and harmed society the integrity of the medical profession and patients For those concerned with the quality of health care or medical ethics *Medicine Money and Morals* is a provocative look into the current health care crisis and a powerful prescription for change *New York Court of Appeals.
