Gray,Christian D. Schunn,2019-04-24 This volume features the complete text of the material presented at the Twenty Fourth Annual Conference of the Cognitive Science Society As in previous years the symposium included an interesting mixture of papers on many topics from researchers with diverse backgrounds and different goals presenting a multifaceted view of cognitive science The volume includes all papers posters and summaries of symposia presented at this leading conference that brings cognitive scientists together The 2002 meeting dealt with issues of representing and modeling cognitive processes as they appeal to scholars in all subdisciplines that comprise cognitive science psychology computer science neuroscience linguistics and philosophy      *The Science of Lay Theories* Claire M. Zedelius,Barbara C. N. Müller,Jonathan W. Schooler,2017-07-14 This timely and important collection broadens our understanding of the ways in which lay theories also known as folk psychologies implicit theories na ve theories or mindsets impact our lives and social

relations Moving well beyond lay theories as applied to intelligence and achievement this volume considers lay theories in an admirably wide context including perspectives on prejudice creativity self regulation health free will justice magic religion and more Eminent and emerging scholars alike provide a comprehensive overview that presents and synthesizes cutting edge contemporary research on lay theories spanning social cognitive developmental cultural and clinical psychology Structurally this volume is organized in three parts Beginning with a preface by renowned scholar Carol Dweck the first part looks at the origins and nature of lay theories and how malleable they are The second part explores lay theories about common psychological phenomena The third section discusses lay theories about the metaphysical or supernatural Finally the last section explores the important question of how lay theories impact health and health behavior Taken together the chapters provide an integrative survey of the science of lay theories bringing together many perspectives that previously have been studied largely in isolation This volume is more than the sum of its parts perspectives from different strands of research provide insights that cut across research disciplines making novel connections and prompting new directions for this field of study Shedding light on how our beliefs shape all facets of our lives *The Science of Lay Theories How Beliefs Shape Our Cognition Behavior and Health* will appeal to researchers and practitioners in psychology as well as philosophers cognitive and developmental neuroscientists religious scholars sociologists and anthropologists It is very rare to say of an edited volume of scholarly chapters I couldn't put it down Yet that was the case with this book It's not just that I have worked in this field for many years but rather with every chapter I felt I was gaining new insights into what deep down people really believe and how these beliefs influence their lives Carol Dweck Stanford University Palo Alto CA USA *Grounding Cognition* Diane Pecher, Rolf A. Zwaan, 2005-01-10 One of the key questions in cognitive psychology is how people represent knowledge about concepts such as football or love Some researchers have proposed that concepts are represented in human memory by the sensorimotor systems that underlie interaction with the outside world These theories represent developments in cognitive science to view cognition no longer in terms of abstract information processing but in terms of perception and action In other words cognition is grounded in embodied experiences Studies show that sensory perception and motor actions support understanding of words and object concepts Moreover even understanding of abstract and emotion concepts can be shown to rely on more concrete embodied experiences Finally language itself can be shown to be grounded in sensorimotor processes This book brings together theoretical arguments and empirical evidence from several key researchers in this field to support this framework
