The Art and Politics of Academic Governance Kenneth P. Mortimer, Colleen O'Brien Sathre, 2010-02-15 Using case studies and relevant literature this book illustrates the challenges to legitimate Shared governance domains when the routine of the academy is forced to deal with big issues often brought on by external forces Mortimer and Sathre have gone beyond a discussion of faculty administrative behavior by focusing on what happens when the legitimate governance claims of faculty trustees and presidents clash They place these relationships in the broader context of internal institutional governance and analyze the dynamics that unfold when advocacy trumps collegiality The book closes with a defense of shared governance and offers observations and practical suggestions about how the academy can share authority effectively and further achieve its mission *Faculty Participation in Academic Governance* AAHE Task Force on Faculty Representation and Academic Negotiations, American Association for Higher Education. Academic Governance in the Contemporary University Julie Rowlands, 2016-10-12 This book addresses three central questions in contemporary university governance 1 How and why has academic governance in Anglophone nations changed in recent years and what impact have these changes had on current practices 2 How do power relations within universities affect decisions about teaching and research and what are the implications for academic voices 3 How can those involved in university governance and management improve academic governance processes and outcomes and why is it important that they do so The book explores these issues in clear concise and accessible language that will appeal to higher education researchers and governance practitioners alike It draws on extensive empirical data from key national systems in the Anglophone world but goes beyond the simply descriptive to analyse and explain **The Control of the Campus**, 1982 Governance in U S higher education is discussed based on a 1982 survey of decision making in higher education with attention to its roots the effects of current conditions on decision making arrangements and a possible governance framework for the future While both private and public education are considered the public sector is emphasized Governance is defined as both formal decision arrangements and informal procedures by which standards are maintained Information was obtained from a survey of decision making in state higher education agencies flagship universities four year colleges and two year colleges After discussing the mission of universities the tradition of self regulation in American higher education is examined including the governing board and voluntary accreditation Also covered are outside governance connections the state the federal government and the courts that have significantly altered the mission and governance of higher education It is concluded that on balance higher education s partnership with governments on both state and national levels has

generated far more benefits than it has administrative burdens. However, because external influences on academic governance should not be allowed to overwhelm internal governance structures, colleges are urged to strengthen self-regulation capacity to take leadership roles and to revitalize their historic governance tradition. The survey questionnaire is included together with a list of participating institutions and agencies. SW reprinted from ERIC

The AAUP's Policy Documents and Reports, widely known as the Redbook, presents in a convenient format a wide range of policy documents, some formulated in cooperation with other educational organizations. The twelfth edition includes statements and reports on academic freedom, tenure and due process, academic governance, professional ethics, recruitment and faculty appointment, librarians and academic professionals, online and distance education, intellectual property, copyright and outside funding, discrimination, collective bargaining, budgets, salaries and benefits, and students' rights and freedoms. The new edition features central AAUP policy documents that have undergone revision or have received significant statistical and legal updates since the publication of the last edition. These include the Recommended Institutional Regulations on Academic Freedom and Tenure, the Statement on Collective Bargaining, On Collegiality as a Criterion for Faculty Evaluation, The Use and Abuse of Faculty Suspensions and Contingent Appointments, and the Academic Profession, as well as the documents that outline procedures for conducting Association investigations. This edition also features newly rewritten versions of two existing Redbook statements: Academic Freedom and Outside Speakers, and the Statement on Online Education. And nine documents are included for the first time, including four on academic governance: Confidentiality and Faculty Representation in Academic Governance, Faculty Evaluation of Administrators, Faculty Communication with Governing Boards, Best Practices, and On the Use of Executive Recruiters in Presidential Searches, and a 2024 statement on achieving racial justice in higher education: On Eliminating Discrimination and Achieving Equality in Higher Education.

An Anthropology of Academic Governance and Institutional Democracy, Murray J. Leaf, 2018-07-26. This anthropological study of university governance organizations has four main purposes. It aims to describe the principles of effective faculty governance organizations and shared governance to help mobilize opposition to a large and extremely well-funded system of political attacks aimed at destroying faculty governance organizations to demonstrate the value of the theory of human social

organizations and to enable universities to become more effective in generating the intellectual advances we must make in order to solve the current global crisis of sustainability and political instability Political democracy depends on an educated public and academic democracy is integral to producing such knowledge
