modern university is being transformed in an increasingly global economy of higher education where luxury is replacing
access More than just a sign of corporatization and privatization academic brands provide a unique window on the university
s concerns and struggles with conveying excellence and reputation in a competitive landscape organized by rankings while
also capitalizing on its brand to generate revenue when state support dwindles This multidisciplinary volume addresses
topics including the uniqueness of academic brands their role in the global brand economy of distinction and their
vulnerability to problematic social and political associations By focusing on brands the volume analyzes the tensions between
