Accelerated Best Practice Implementing Success In Professional Firms:

Accelerated Best Practice Fiona Westwood,2004 *Accelerated Best Practice* Fiona Westwood,2008 Allows readers to implement strategic and operational change quickly and successfully Based on the author s own experience of working with professional service organisations this title enables senior managers to diagnose problems and source practical help by way of case studies applied tools and techniques to put theory into practice **Exercising Professional Judgement** Fiona Westwood,2016-09-16 This is the fourth in my series of books about professionals and their practice It investigates the importance of learning from work based experiences in a supportive community of practice that encourages reflection It concentrates on the exercise of professional judgement in the context of mastering the craft of lawyering I feel that this is especially important at this point in time when current changes in the way legal services are delivered may put at risk the traditional method the legal profession has used to develop this in its new entrants Everyone involved in the UK legal profession is well aware of recent changes to its structure and methods of working The opening up of the legal services market to alternative business structures following the Legal Services Act 2007 has created a variety of delivery mechanisms ranging from acquisitions of indigenous law firms by other jurisdictions to new corporate entrants adding legal advice to their existing products Adjustments to fee levels and work practices mean that some are concentrating on specialist advice while others are employing para legals to complete work on commoditised client files Whether these responses will achieve the government commissioned Clementi Report s Clementi 2004 aim of improving the quality of the provision of legal services remains to be seen Some incomers have already found it more difficult than they anticipated to operate profitably and have withdrawn from the market However the overall effect has been to fragment what up until 2007 had been a fairly cohesive profession Regardless of all of this clients continue to expect their legal advisors to provide them with solutions to their problems and where needed access to justice To achieve this given the complexities of what is involved in the application of the relevant law to the particular situations clients find themselves in lawyers have to exercise their professional judgement so as to determine what options are available and most importantly achievable Traditionally they have developed the ability to do this through induction to and subsequent experience in a community of practice where more senior practitioners allocate tasks to and supervise novices as well as share with them the way they arrive at and implement the most appropriate choice available in the specific set of circumstances However recent alterations in work practices brought about in particular by information technology have reduced the availability of the type of low risk routine work usually completed by trainees to allow them to gain experience and proficiency So this book is about identifying how lawyers up to this point in time have developed their judgement and through recognising the changes affecting their profession offering a model that will continue to allow new entrants to achieve this regardless of the type of legal services providers they work in In addition given that external influences including IT and pressures on profits are being felt by many

professions I hope that the Model will also be relevant to other disciplines where the training of novices has to be embedded in organisations that need to match their people and resources with the management of risk client satisfaction and quality of services

The Calling of Law Fiona Westwood, Karen Barton, 2016-04-01 As one of the learned professions requiring advanced learning and high principles law enjoys a special standing in society In return for its status and rank the legal profession is expected to exhibit the highest levels of honesty trust and morality the very values which underpin the legal system itself This in turn entrusts to legal education a particular problem of addressing not only the substantive elements of the body of law but a means through which the characteristics of the calling of law are imparted and instilled At a time when the very essence of the legal profession is under threat this book calls for a realignment of the legal curriculum and pedagogies so as to emphasise the development of culture over industry character over eloquence and calling over skill Chapters are grouped around the core content and key themes of Curiosity Calling Character and Conscientiousness Contract and Culture The volume includes contributions from leading experts drawn internationally and from other professional disciplines in order to present alternative approaches aimed at tackling common issues providing insight and provoking debate

[Affect and Legal Education](#) Caroline Maughan, Paul Maharg, 2016-03-23 The place of emotion in legal education is rarely discussed or analysed and we do not have to seek far for the reasons The difficulty of interdisciplinary research the technicisation of legal education itself the view that affect is irrational and antithetical to core western ideals of rationality all this has made the subject of emotion in legal education invisible Yet the educational literature on emotion proves how essential it is to student learning and to the professional lives of teachers This text the first full length book study of the subject seeks to make emotion a central topic of research for legal educators and restore the power of emotion in our teaching and learning Part 1 focuses on the contribution that neuroscience can make to legal learning a theme that is carried through other chapters in the book Part 2 explores the role of emotion in the working lives of academics and clinical staff while Part 3 analyses the ways in which emotion can be used in learning and teaching The book interdisciplinary and wide ranging in its reference breaks new ground in its analysis of the educational lifeworld of situations communities actors and interactions in legal education
