Non-Governmental Development Organizations and the Poverty Reduction Agenda Jonathan Makuwira, 2013-12-04 The Non Governmental Development Organisations NGDOs have over the past two decades entered centre stage in their active participation in the social political and economic issues affecting both the developing and developed world This book offers a highly stimulating and concise summary of the NGDO sector by examining their history and metamorphosis their influence on the social political and economic landscapes of the Northern and Southern governments and societies The author analyses competing theoretical and conceptual debates not only regarding their contribution to the global social political dynamism but also on the sector s changing external influence as they try and mitigate poverty in marginalized communities This book presents NGDOs as multidimensional actors propelled by the desire to make a lasting change but constrained by market oriented approaches to development and other factors both internal and external to their environment While a lot of attention has been given to understanding international NGDOs like World Vision International Oxfam Care International and Plan International this book offers a critical analysis of grassroots organizations those NGDOs founded and established by locals and operate at the deepest end of the development contexts This work will be of interest to students and scholars in a range of areas including Development Studies International Organizations and Globalization

Non-Governmental Organisations - Performance and Accountability Michael Edwards, David Hulme, 2014-03-18 The last decade has seen some significant changes in international development and in the status of non governmental organisations operating in the field Not only has the number of NGOs virtually doubled many of them have seen a considerable growth in their budgets and have grown closer to governments and official aid agencies NGOs are acknowledged by many to be more effective agents of development than governments or commercial interests even as a magic bullet for development problems Despite these positive trends the real impact of the NGO sector is not well documented This is partly because NGO performance assessment and accountability methods are weak and partly because NGOs are caught up increasingly in the world of official aid which pushes them towards certain forms of evaluation at the expense of others This unique book takes a hard and critical look at these issues and describes how NGOs can and must

improve the way they measure and account for their performance if they are to be truly effective [The Management of Non-Governmental Development Organizations](#) David Lewis,2006-12-11 The first edition of this book was published in 2001 by Routledge and was the first academic text on the important new emerging field of NGO management It sets out the field for researchers with a new and original conceptual framework contains a comprehensive review of existing literature from a variety of disciplines including management development studies and social policy and provides wide ranging examples from the author s own practical and research experience New to this edition twelve new detailed case studies of NGO management issues and challenges new discussion points lessons learned and questions for debate to guide the reader through each chapter definitions of key terms highlighted key ideas to illustrate each chapter Revealing the distinctive organizational challenges faced by NGOs this second edition provides a fully updated and revised text that will prove invaluable to all those studying or working in NGOs the voluntary sector or development studies Visit the Companion website at www.routledge.com/textbooks/9780415370936

Non-Governmental Organizations, Management and Development David Lewis,2014-03-05 Non Governmental Development Organizations have seen turbulent times over the decades however recent years have seen them grow to occupy high profile positions in the fight against poverty They are now seen as an important element of civil society a concept that has been given increasing importance by global policy makers This book has evolved during the course of that period to be a prime resource for those working or wishing to work with and for NGOs The third edition of Non Governmental Organizations Management and Development is fully updated and thoroughly reorganized covering key issues including but not limited to debates on the changing global context of international development and the changing concepts and practices used by NGOs The interdisciplinary approach employed by David Lewis results in an impressive text that draws upon current research in non profit management development management public management and management theory exploring the activities relationships and internal structure of the NGO This book remains the first and only comprehensive and academically grounded guide to the issues facing international development NGOs as they operate in increasingly complex and challenging conditions around the world It is the perfect resource for students undertaking studies of NGOs and the non profit sector in addition to being an excellent resource for development studies students more generally

Handbook of Research on NGOs Aynsley Kellow,Hannah Murphy-Gregory,2018-09-28 This volume provides a critical overview of research on Non governmental Organisations NGOs While it notes that the definition of NGOs is contested and can include both business and national groups it focuses primarily on international NGOs engaged with human rights social and environmental concerns and aid and development issues With contributions by Peter Willetts Tom Davies Bob Reinalda and other leading scholars it provides a series of critical essays on both general aspects of NGOs and significant issues of particular concern [Accountability Online](#) Ting Wang,2013 As the programs and services of nonprofit organizations in international development are considered more cost effective than those

of government and business organizations international development nonprofit organizations are a crucial part of the social economic and political landscape of the United States However public trust toward nonprofit organizations is generally low because of the insufficient accountability among such organizations Therefore it is vital for international development nonprofit organizations to demonstrate their accountability to their stakeholders Stakeholder management theory and autonomy and accountability theory address this issue The purpose of this study was to examine the extent to which international development nonprofit organizations demonstrate accountability to different stakeholders specifically donors beneficiaries government and boards of directors by conducting a content analysis of the websites of the 102 largest international development nonprofit organizations in the United States The study also examined the organizations practical and strategic accountability and the relationship between accountability and organizational size

New Perspectives on Foreign Aid and Economic Development B. Mak Arvin, 2002-05-30 The success or failure of economic assistance programs is a shared responsibility of recipient countries and donors The negative attitude about aid prevalent today underscores a perception the aid has failed Critics often blame corrupt regimes weak governments or poor economic policies However the poor track record of aid is also due to donors inability to allocate limited funds effectively and poor coordination of their aid efforts Declining aid budgets have led to fundamental questioning of foreign aid s allocation and utility while the apparent ineffectiveness of aid has shrunk aid budgets and turned public opinion against providing it This edited collection containing pieces written by leading development specialists evaluates these emerging questions of allocation and efficiency Development economists policy makers and development specialists will benefit from reading this work Chapters examine the optimal and intertemporal allocation of aid the role and accountability of NGOs in allocation the importance of untying a new perspective on low levels of aid and links between the allocation pattern of donors Additional chapters deal with the impact of aid on economic growth democracy wage inequality between skilled and unskilled labor and the role of governance and institutional capacity in aid effectiveness An effective balance between theoretical and empirical models is offered to better illustrate the issues involved

Staff Development in Human Service Organizations Harvey J. Bertcher, 1988

The Politics of Urban Development Clarence Nathan Stone, Heywood T. Sanders, 1987 In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries From that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed But what else needs to be said about the policies and politics of urban development To supplement prevailing theories *The Politics of Urban Development* argues that the role of local actors in making development decisions merits closer study

Whatever the structural constraints politics still matters Collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference

Development as a Human Right Bård-Anders Andreassen, Stephen P. Marks, 2010 This 2nd edition of the book originally published in 2006 has a new Foreword by the UN Commissioner for Human Rights Navanethem Pillay **Debating NGO**

Accountability Jem Bendell, 2006 Concerns about the role and accountability of NGOs have been voiced from different quarters in recent years Some donors governments corporations and international agencies raise important questions about the effectiveness of NGO work and the legitimacy of their advocacy Some NGOs have also recognized the need to ensure good practice in the wider voluntary sector For this emerging agenda to lead to positive development outcomes we need to ask what initiatives will improve the accountability of all institutions to the people whose lives they shape and what initiatives could serve merely to undermine NGOs useful and largely accepted role in holding business and government accountable for their actions This publication puts democracy and human rights at the centre of the debate about NGO accountability
