Crises In Modern Thought:

Crises in Modern Thought J. Donald Walters, 1988 *Crises in Modern Thought* is completely in harmony with the findings of modern science Yet it provides them with deep meaning This message must be spread everywhere Leon Kolb anthropologist Stanford Professor Emeritus The scientific advances of the last century have in some ways also introduced a sense of meaninglessness into modern life As the scientific principle of relativity has become widely accepted traditional values have been greatly weakened *Crises in Modern Thought* shows how science and values are in fact completely compatible Working with accepted scientific theories *Crises* shows how science and the basic moral values of society enrich each other *CRISES IN MODERN THOUGHT* SWAMI KRIYANANDA, 1972 **Crises in Modern Thought** Swami Kriyananda, 1972 Critique and Crisis Reinhart Koselleck, 2000-03-13 *Critique and Crisis* established Reinhart Koselleck's reputation as the most important German intellectual historian of the postwar period This first English translation of Koselleck's tour de force demonstrates a chronological breadth a philosophical depth and an originality which are hardly equalled in any scholarly domain It is a history of the Enlightenment in miniature fundamental to our understanding of that period and its consequences Like Tocqueville Koselleck views Enlightenment intellectuals as an uprooted unrealistic group of onlookers who sowed the seeds of the modern political tensions that first flowered in the French Revolution He argues that it was the split that developed between state and society during the Enlightenment that fostered the emergence of this intellectual elite divorced from the realities of politics Koselleck describes how this disjunction between political authority proper and its subjects led to private spheres that later became centers of moral authority and eventually models for political society that took little or no notice of the constraints under which politicians must inevitably work In this way progressive bourgeois philosophy which seemed to offer the promise of a unified and peaceful world in fact produced just the opposite The book provides a wealth of examples drawn from all of Europe to illustrate the still relevant message that we evade the constraints and the necessities of the political realm at our own risk *Critique and Crisis* is included in the series *Studies in Contemporary German Social Thought* edited by Thomas McCarthy **Crisis and the Culture of Fear and Anxiety in Contemporary Europe** Carmen Zamorano Llena, Jonas Stier, Billy Gray, 2023-08-01 The accrual of crises over the last two decades with their particular manifestations in the European context has evoked the feeling of living in exceptional times as captured in the recurrent claim that we live in the age of anxiety The main aim of this collection is to analyse from a multidisciplinary perspective the causes and consequences of the current dominance of the discourse of fear anxiety and crisis through the experience of distinct and often interdependent moral panics in twenty first century Europe With its multidisciplinary approach this volume sheds light on the need to view the interrelationship between different crises and their associated affects as crucial in attaining a more nuanced understanding of the aetiology and effects of the current age of anxiety This multidisciplinary scrutiny of the interrelationship of twenty first century fears anxiety and crises signals an

original engagement with these complex phenomena in order to make their emergence and profound effects on contemporary society more comprehensible. The timeliness of the thematic focus and the rigorous in depth analyses make this collection relevant to students and academics within the fields of sociology, literary and cultural studies, political science and anthropology, as well as to those in European studies and global studies.

The Apocalyptic Dimensions of Climate Change Jan Alber, 2021-09-07. Climate change and the apocalypse are frequently associated in the popular imagination of the twenty first century. This collection of essays brings together climatologists, theologians, historians, literary scholars and philosophers to address and critically assess this association. The contributing authors are concerned among other things with the relation between cultural and scientific discourses on climate change, the role of apocalyptic images and narratives in representing environmental issues and the tension between reality and fiction in apocalyptic representations of catastrophes. By focusing on how figures in fictional texts interact with their environment and deal with the consequences of climate change, this volume foregrounds the broader social and cultural function of apocalyptic narratives of climate change. By evoking a sense of collective human destiny in the face of the ultimate catastrophe, apocalyptic narratives have both cautionary and inspirational functions. Determining the extent to which such narratives square with scientific knowledge of climate change is one of the main aims of this book.

History of Political Philosophy Leo Strauss, Joseph Cropsey, 2012-06-15. Designed for undergraduate students, a historical survey of the most important political philosophers in the Western tradition. This volume provides an unequalled introduction to the thought of chief contributors to the Western tradition of political philosophy from classical Greek antiquity to the twentieth century. Written by specialists on the various philosophers, this third edition has been expanded significantly to include both new and revised essays.

Constructing Crisis Bert Spector, 2019-09-05. Crises aren't real objective events. Instead, Spector demonstrates they are claims of urgency imposed by leaders to assert power and exert control.

Turning the Tables on Apologetics Jeffrey L. Hamm, 2018-05-22. Does apologetic method matter? Helmut Thielicke argues that the method should conform to its own message. He thus rejects traditional apologetic methodologies beholden to supposedly neutral scientific and philosophical paradigms. Seeking to reform Christian conversation, Thielicke discovers a lost way of persuasion that is the table turning approach found in Christ's conversations. Whenever Jesus is questioned, he seldom answers directly. For he refuses to allow the conversation to be framed by an autonomous mindset and instead responds with a counterquestion. Christ's style of persuasion as the controller of the question subverts his hearers' presuppositions and challenges their unbelief. This approach is the reverse of the defensive answer giving mode of traditional apologetics. In view of renewing Christ's method, Thielicke insists that the task of apologetics is something which is always on the offensive and far from giving ready made answers to the doubtful questions of men. Turns the tables by putting questions on its own account, aggressive, violent, radical questions and striking straight to the hearts of men. Christian conversation must integrate Christ's method with his message in order to advocate the message.

On the Way to Theory Lawrence Grossberg,2024-09-13 In *On the Way to Theory* Lawrence Grossberg introduces the major ways of thinking that provide the backstory for contemporary Western theory Asking readers to think about thinking Grossberg traces cultural and critical theory s foundations from the contested enlightenments to modern and postmodern conceptualizations of power experience language and existence He introduces key figures as historical characters and lays out the unique set of tools for thought that their deep theories offer Through finely tuned and accessible descriptions of their concepts and logics Grossberg highlights thinkers including Spinoza Kant Hegel Marx Nietzsche Wittgenstein Heidegger Derrida Foucault Deleuze and Hall defining the possibilities of their thought This book is essential for those interested in how theories shape our understanding of the world influence our choices and define our realities It challenges us to recognize the multiplicity and complexities of ways of thinking in our quest for knowledge and understanding By setting out a story of theoretical foundations Grossberg invites readers to think toward the future of theory and expand conversations around theoretical scrutiny and criticism

Crises in the Twentieth Century: Crisis, conflict and instability Michael Brecher,Jonathan Wilkenfeld,Sheila Moser,1988 **Also a History of Philosophy, Volume 1** Jürgen Habermas,2023-08-23 This is the first volume of a ground breaking new work by Jürgen Habermas on the history of philosophy In this major new work Habermas sets out the ideas that inform his systematic account of the history of Western philosophy as a genealogy of postmetaphysical thinking His account goes far beyond a vindication of the enduring relevance of philosophical reflection founded on communicative reason as a source of orientation in the modern world He contrasts this conception with prominent diagnoses of the supposed crisis of Enlightenment reason and culture that seeks redemption in the affirmation of traditional religious authority Schmitt the timeless validity of Greek metaphysics Strauss a numinous conception of nature Levinas and an occurrence of being that speaks to us from beyond the mists of pre Socratic thought Heidegger Habermas situates Western philosophy in relation to traditions of thought founded in the major worldviews Judaism Buddhism Confucianism and Taoism that continue to shape contemporary culture and civilization At the same time he lays the groundwork for his analysis in the later volumes of the constitutive role played by the discourse on faith and knowledge in the development of Western philosophy which is the result of the unique symbiosis that Christianity entered into with Greek thought with the Christianization of the Roman Empire Far from raising claims to exclusivity completeness or closure Habermas s history of philosophy published in English in three volumes opens up new lines of research and reflection that will influence the humanities and social sciences for decades to come [The London Quarterly Review](#) William Lonsdale Watkinson,William Theophilus Davison,1864 **The Crisis of Our Time** David B.
