**The Communist Experience in America** Harvey Klehr, Arguments about whether distinctive features of American society culture political structure economic system or population account for the relative weakness of American radicalism have engaged historians sociologists and political scientists for decades Influential concepts such as frontier theory have been linked with the absence of class conflict in America Other analysts have attributed the failure of the American Left to fierce repression giving red scares and the McCarthy era as illustrations Some have linked the American Left's failure to American immigration winner take all elections and the cultural values of individualism The Communist Party one of America's largest and longest lasting radical groups offers many lessons about how radical political groups can take advantage of or squander their opportunities Klehr focuses on the theme of American exceptionalism and problems that America's capitalist society raised for Marxism and other radical groups The Communist Experience in America deals with dissident communist formulations Such groups included a number of talented men who went on to a variety of political and literary careers Klehr also deals with fellow travelers some of whom wrote fascinating essays on American exceptionalism and the decline of political extremism In part Klehr hopes to inspire the same moral outrage about Communism that fuels those dedicated to ensuring that Nazi crimes are never forgotten or obfuscated Communism in practice everywhere in the world also came at enormous human cost Regardless of their other virtues or qualities those who supported or defended Communism from the safety of the United States must be called to account This work does just that in detail and depth Harvey Klehr is Andrew W Mellon Professor of Politics and History at Emory University He is the author of numerous articles and books most recently *Early Cold War Spies The Espionage Trials* that

Shaped American Politics Communism Espionage and The Cold War A Curriculum Unit of Study for Grades 9 12 and In Denial Historians Communism and Espionage **Witness** Whittaker Chambers,2014-12-09 1 New York Times bestseller for 13 consecutive weeks As long as humanity speaks of virtue and dreams of freedom the life and writings of Whittaker Chambers will ennoble and inspire PRESIDENT RONALD REAGAN One of the dozen or so indispensable books of the century GEORGE F WILL Witness changed my worldview my philosophical perceptions and without exaggeration my life ROBERT D NOVAK from his Foreward Chambers has written one of the really significant American autobiographies When some future Plutarch writes his American Live he will find in Chambers penetrating and terrible insights into America in the early twentieth century ARTHUR SCHLESINGER JR Chambers had a gift for language to call Chambers an activist or Witness a political event is to say Dostoevsky was a criminologist or Crime and Punishment a morality tract WASHINGTON POST Chambers was not just the witness against Alger Hiss but was also one of the articulators of the modern conservative philosophy a philosophy that has something to do with restoring the spiritual values of politics SAM TANENHAUS author of Whittaker Chambers One of the few indispensable autobiographies ever written by an American and one of the best written too HILTON KRAMER The New Criterion First published in 1952 Witness is the true story of Soviet spies in America and the trial that captivated a nation Part literary effort part philosophical treatise this intriguing autobiography recounts the famous Alger Hiss case and reveals much more Chambers worldview and his belief that man without mysticism is a monster went on to help make political conservatism a national force Regnery History s Cold War Classics edition is the most comprehensive version of Witness ever published featuring forewords collected from all previous editions including discussions from luminaries William F Buckley Jr Robert D Novak Milton Hindus and Alfred S Regnery Crisis of Socialism Randhir Singh,2006 Deals with the basic issues of why and how of the collapse of Soviet Union s actually existing socialism This book looks at its implications and where it leaves the question of socialism It covers the impact of the collapse Marxism of Karl Marx socialism a negation of capitalism history s trick on the doctrine of Karl Marx and more **Socialism Or Extinction** Ted Reese,2020-11-03 A vital indispensable contribution to Marxist theory Reese explains the cause of the crisis and its solution with clarity and precision Get this now James Bell Prolekt Socialism or Extinction Climate Automation and War in the Final Capitalist Breakdown is a systematic theoretical Marxist analysis of the unprecedented crises engulfing humanity arguing that capitalism per se because its ever growing dependence on exploiting labour makes the labour intensity of extraction based production increasingly necessary is the cause of and can only continue to accelerate the climate crisis that the overall rate of profit is trending historically towards a permanent zero and that the final expression of this is the tendency towards fully automated production which is eliminating the sole source of profit surplus value the exploitation of commodity producing human labour that drawing on the work of Karl Marx and Henryk Grossman capitalism is heading unavoidably in purely economic terms towards a final insurmountable breakdown that is destined to strike much earlier than a zero rate of

profit and indeed that the next looming crisis will at some point see all fiat currencies collapse against precious metals ie worldwide hyperinflation It is also argued therefore that a global digital currency whereby exchange value value creation is based on labour s use value instead of its surplus value ending the exploitation of labour is becoming an economic necessity that the accumulation crisis is forcing the world s imperialist powers into direct confrontation meaning humanity faces not one extinction threat but two that the solution to the climate crisis requires value creation to become based on use value instead of surplus value ending the absolute economic need to plunder the environment an incentivised transition towards a communal system of living in order to achieve massive efficiency gains and the end of the alienation capitalism imposes between man and nature in large part by ending the international prohibition of hemp nature s most prolific and versatile crop and the key not only to reversing desertification and stabilising the climate but to the next stage in technological and industrial development ie a green industrial revolution that is actually green that the productive forces in line with their historical development now demand democratic central planning of the economy as a whole ie a public monopoly meaning the all socialist state and a Communist International remain necessary during the transition to global stateless communism a borderless world of equality and relative abundance for all
