Crisis of Dissent Harold Howe, 1968\* Dissent and the Failure of Leadership Stephen P. Banks, 2008 How is dissent implicated in problems plaguing theory development in leadership studies This collection of original papers puts forward proposals for legitimating dissent as a unique instrument for advancing social development and avoiding failures of leadership Western Society in Transition Michael A. Ledeen, Volker Bornschier, 2018-04-24 An enormous acceleration of history has occurred in the current decade thereby radically changing world society in many respects The core countries grouped around the triad formed by the United States Japan and the European Union have experienced successive waves of change marked by phases of ascent unfolding and decay of societal models What seemed stable and predictable in past decades came close to collapse or broke down entirely As a result we are now living through a crisis of legitimation characterized by acute contradictions A new order with a fresh basic consensus around an overarching set of norms that allows problems to be solved efficiently has not yet crystallized Western Society in Transition examines the succession of societal models of the Western world and indications of its probable shape in the future Bornschier characterizes the 1985 1995 period as a decade of Third World debt and depression continued economic decline in the United States a steady ascent of Japan Western Europe s move toward political union and the collapse of the Soviet Union Against this background he sketches various elements of a theoretical perspective he calls evolutionary conflict theory The primary focus of interest of this theory is not on single societies but on measures of social transformation at the core of world society Western Society in Transition deals with fundamental questions How does social order arise and why does it dissolve What provides social

cohesion What makes society progress Institutional spheres of Western society such as technology firms the market state building education power conflict and social movements are analyzed in detail Peter Lengyel editor emeritus of the International Social Science Journal says of Western Society in Transition I have never seen such a succinct clear and persuasive treatment which adroitly draws together elements from economics history sociology and technology into a strictly contemporary kind of political economy This timely assessment of the Western world will be of interest to social scientists historians economists and international relations scholars Michael Harrington Robert Gorman,2021-12-24 In this provocative biographical portrait Robert A Gorman examines the political and intellectual life of this engaging radical thinker while looking ahead to the ways in which the work and example he has left us can affect political life in the twenty first century Michael Harrington s major attempt to Americanize socialism plays a big part in Gorman s analysis He tells readers how it is possible to be both radical and patriotic and how an unjust system can be transformed without being destroyed

Digital Spaces of Civic Communication Anne Mollen,2019-08-20 This book addresses the socio technical constitution of civic communication in increasingly digital democracies Despite problematic phenomena like hate speech in online commenting it argues that citizens potential for resisting technological inscriptions in digital media remains a fundamental democratic right While producers inscribe anticipations for how people should be discussing political issues into commenting interfaces citizens still resist these technological inscriptions in their commenting practices This dialectic interrelation between interfaces and practices highlights the inadequacy of purely technological solutions for undemocratic tendencies in digital media
