Critical Perspectives in Rural Development Studies Saturnino M. Borrás Jr., 2013-09-13 Agrarian transformations within and across countries have been significantly and dynamically altered during the past few decades compared to previous eras provoking a variety of reactions from rural poor communities worldwide The recent convergence of various crises financial food energy and environmental has put the nexus between rural development and development in general back onto the center stage of theoretical policy and political agendas in the world today Confronting these issues will require re engaging with critical theories taking politics seriously and utilizing rigorous and appropriate research methodologies These are the common messages and implications of the various contributions to this collection in the context of a scholarship that is critical in two senses questioning prescriptions from mainstream perspectives and interrogating popular conventions in radical thinking This book focuses on key perspectives frameworks and methodologies in agrarian change and peasant studies The contributors are leading scholars in the field of rural development studies Henry Bernstein Terence J Byres Saturnino M Borrás Jr Marc Edelman Crist bal Kay Benedict Kerkvliet Philip McMichael Shahra Razavi Ian Scoones and Teodor Shanin This book was previously published as a special issue of the Journal of Peasant Studies [The Rise and Fall of Countryside Management](#) Ian D. Rotherham, 2015-07-16 For at least half a century since the emergence of Country Parks and Forest Parks countryside services have provided leisure tourism conservation restoration and regeneration across Britain Yet these services are currently being decimated as public services are sacrificed to the new era of austerity The role and importance of countryside management have been barely documented and the consequences and ramifications of cuts to these services are overlooked and misunderstood This volume rigorously examines the issues surrounding countryside management in Britain The author brings together the results of stakeholder workshops and interviews and in depth individual case studies as well as a major study for the Countryside Agency which assessed and evaluated every countryside service provision in England A full and extensive literature review traces the ideas of countryside management back to their origins and the author considers the wider relationships and ramifications with countryside and ranger provisions around the world including North America and Europe The book provides a critical overview of the history and importance of countryside management detailing the achievements of a largely forgotten sector and highlighting its pivotal yet often underappreciated role in the wellbeing of people and communities It serves as a challenge to students planners politicians conservationists environmentalists and land managers in a diversity of disciplines that work with or have interests in countryside leisure and tourism community issues education and nature conservation *Writing the Rural* Professor Paul J Cloke, Professor Marcus A Doel, Dr David Matless, PhD, Professor Nigel Thrift, Dr Martin Phillips, 1994-07-28 This book arises out of an ESRC project devoted to an examination of the economic social and cultural impacts of the service class on rural areas The research was an attempt to document these impacts through close empirical work in a set of three rural

communities but something happened on the way The authors found that the rural became a real sticking point Respondents used it in different ways as a bludgeon as a badge as a barometer to signify many different things security identity community domesticity gender sexuality ethnicity nearly always by drawing on many different sources the media the landscape friends and kin animals It became abundantly clear that the rural whatever chameleon form it took was a prime and deeply felt determinant of the actions of many respondents Yet it was also clear that to the authors they possessed no theoretical framework that could allow them to negotiate the rural to deconstruct its diverse nature as a category Rather each of the extended essays in the book is an attempt by each author to draw out one aspect of the rural by drawing on different traditions in social and cultural theory

Critical Rural Theory Alexander R. Thomas,2011 **Critical Rural Theory** provides an exploratory foundation for anyone interested in examining the hegemonic power of urbanization and its impacts on rural people and places This book is without parallel in the rural sociological literature for its commitment to uncovering the power of culture in addition to structure and space in maintaining urban power

The Changing American Countryside Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers **The Changing American Countryside** a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life
