Critical Thinking Helping Students Learn Reflectively:

Critical Thinking S. Samuel Shermis, 1992 Based upon the idea that the only hope for substantial curricular reform and for adoption of reflective inquiry in American schools is for teachers to redefine the basic pedagogical concepts that they have inherited this book discusses how to teach students to reflect upon what they learn in school The three major sections of the book discuss 1 reasons why educators still do not teach reflective inquiry 2 a theory of reflective inquiry and 3 teachers and students identifying and internalizing problems Topics in the first section concern barriers to reflective inquiry philosophical assumptions that prevent reflective thought teaching as transmission philosophical absolutes a semantic analysis eclecticism and cultural forces Topics in the second section concern John Dewey's conception of reflective thinking what one must know before the process of inquiry begins thought and emotion knowledge as a function of a theory of reality the subjective objective dualism knowledge as pluralistic values as inseparable from knowledge transmission as the result of a philosophical position discussion as the heart of inquiry and what reflective discussion is Finally the third section discusses problem solving and reflective inquiry a model of reflective teaching in action and implications of applied critical inquiry for schools An appendix presenting a brief synopsis of Bloom's taxonomy and a 108 item bibliography are attached RS

Cultivating Student Reflection Kate Charner-Laird, Sarah Fiarman, Frederick Won Park, Sylvia Soderberg, 2003-09 Reflective learning or the ability of a student to organize new knowledge with greater meaning and success to think about their thinking is explained and documented in this book meant to help students more fully learn Created by one of the most highly subscribed schools in Cambridge MA this publication documents how to create a culture of reflection for both students and teachers through portfolios goal setting and asking the right questions *Resources in Education*, 1992 **Recent Department of Education Publications in ERIC** United States. Reflective Thinking and Teaching Practices S. Chee Choy, Pou San Oo, 2012 The concept of reflective thinking as a precursor for incorporating critical thinking has been not been adequately researched Most research has not given any effective strategies on how to incorporate these two concepts There is a constant need to incorporate critical thinking into the classroom without much success This study will attempt to show a link between reflective thinking and its ability to stimulate critical thinking Teachers often perceive that critical thinking skills need to be taught however research has shown that they may not know how to do this effectively The use of reflective thinking may be a precursor to stimulating critical thinking in teachers The research questions are on the reflective thinking skills of teachers and how they perceive themselves and their teaching In this study a total of 60 participants from institutions of higher learning volunteered to

answer a questionnaire to determine the level at which they reflected on their teaching practices as an indicator of their level of critical thinking It was found that most of the teachers did not reflect deeply on their teaching practices They did not seem to practice the four learning processes assumption analysis contextual awareness imaginative speculation and reflective scepticism which were indicative of reflection It would suggest that critical thinking is practised minimally among teachers Further research need to be carried out on how to bring about reflective practices among teachers and how it would enhance the quality of lessons in terms of critical thinking Contains 2 tables [Catalog of ERIC clearinghouse publications](#) ,19??

The Relationship Between Critical Thinking Skills and Development of Reflective Judgment Among Adolescent and Adult Women Mary Margaret Knutson Brabeck,1980 [How to Teach Metacognitive Reflection](#) Robin Fogarty,1994-06 Metacognition or thinking about thinking is an awareness of and control over one s own thinking behavior This guide for teaching metacognitive reflection in the classroom is divided into three sections that highlight the arenas where metacognition can occur planning monitoring and evaluating Within each section 10 specific strategies are developed for immediate use in the classroom Some of these strategies to enhance reflection include stem statements think aloud techniques double entry journals self administered checklists and portfolio registries The easy to implement lesson models teach students to pose study questions for themselves explore the consequences of their choices decisions and actions reflect on how they learn synthesize their thoughts and actions in a log or journal and contemplate their reflective strategies for transfer and use The practical applications in this guide enable teachers to enhance their ability to monitor student reactions foster reflection of student work and promote students transfer of learning to novel situations Contains a 94 item bibliography TJQ

The ERIC Review ,1991 Provides information on programs research publications and services of ERIC as well as critical and current education information *Reasonable Children* Michael S. Pritchard,1996 The public outcry for a return to moral education in our schools has raised more dust than it s dispelled Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our

children's moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another's ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children's remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education Journal of Social Studies Research ,2001
