*The Role of Legumes in the Farming Systems of the Mediterranean Areas* A.E. Osman, M.M. Ibrahim, M.A. Jones, 2012-12-06

Legumes are an important source of protein for humans and animals. They provide nutritionally rich crop residues for animal feed and play a key role in maintaining the productivity of soils particularly through biological nitrogen fixation. They are therefore of immense value in rainfed farming systems. The International Center for Agricultural Research in the Dry Areas (ICARDA) has a responsibility for research on food, pasture and forage legumes. The Center also has the broad objective of improving livestock production in rainfed farming systems. Although food legumes have been known and grown by farmers in the WANA region for a long time, their productivity has remained low and variable. Forage legumes, on the other hand, are not so well known by farmers of the region and their role in the farming systems is not so well understood. Thus we need to develop the concept of using forage legumes as crops and to fit them into cropping systems. In its efforts to increase the productivity of food legumes and develop the legume-based crop-livestock systems, ICARDA has established a network of scientists in the different National Agricultural Research Systems in the region. To further strengthen this network, ICARDA convened a workshop on *The Role of Legumes in the Farming Systems of Mediterranean Areas* in Tunis, Tunisia, 20-24 June 1988. This workshop was co-sponsored by UNDP, who also contributed funds for this publication.

Israeli-Palestinian Water Issues: From Conflict to Cooperation. This book, *Israeli-Palestinian Water Issues: From Conflict to Cooperation*, authored by a group of leading Palestinian, Israeli, and international water experts, is a unique and timely document illustrating the importance of mutual understanding, respect, and amity among peoples during a difficult period of stress whose leaders sadly have not yet found the way of resolving the conflicts between them and of living in peace with each other. Nevertheless, it is a book which demonstrates hope, optimism, and belief that people with good will in their hearts can help contribute to finding the way to peace and mutual cooperation in solving shared problems essential for their mutual survival and welfare. The participants in the 2nd Israeli-Palestinian International Conference on Water for Life in the Middle East, held in Antalya, Turkey, in October 2004, which served as the source of most of the papers in this book, concluded the Conference with the following declaration: "We, two hundred participants in this Israeli-Palestinian International Conference, complete our conference with a sense of optimism. It is clear that the Palestinian and Israeli participants, along with their international partners, remain committed to solving the many challenges associated with water quantity and quality in our region."
