## **Cross Linguistic Perspectives On Language Processing:**

*Cross-Linguistic Perspectives on Language Processing* M. de Vincenzi, V. Lombardo, 2012-12-06 Recent studies in psycholinguistics have ranged through a variety of languages In this trend which has no precedent studies in language processing have followed studies in language acquisition and theoretical linguistics in considering language universals in a broader scope than only in English Since the beginning of the century studies in language acquisition have produced a vast body of data from a number of Indo-European languages and the emphasis on the universal has preceded the emphasis on the particular see Slobin 1985 for a review Nowadays the research in the field advances by means of a continuous linking between the cross linguistic uniformities and the individual language influences on development The level of language universals is continuously refined as the data from a number of languages contribute to the elaboration of a more distinctive picture of the language of children The first cross linguistic studies in theoretical linguistics appeared at the end of the seventies Within the Chomskian paradigm the reference to the Romance languages caused a shift from a rule based toward a principle based formalism Chomsky 1981 1995 within alternative theories the reduced prominence of the pure phrase structure component in favor of the lexicon and or the functional relations see e.g. Lexical Functional Grammar Bresnan 1982 Relational Grammar Perlmutter 1983 sought empirical support in languages exhibiting deep structural differences with respect to English e.g. Bantu Malayalam Romance and Slavic languages Warlpiri The M De Vincenzi and V Lombardo eds **Cross linguistic Perspectives on Language Processing** 1 19

**Language Acquisition Across North America** Orlando L. Taylor, Laurence B. Leonard, 1999 Using the rich linguistic and cultural diversity of North America as a context this well written text provides excellent examples of how unique cultural and linguistic attributes influence the language acquisition process in children The editors discuss the fact that although acquisition of language is universal among the world's children the precise developmental sequence is influenced by the socio-cultural context in which language is acquired Emphasis is placed on the importance of studying different cultural groups and language to arrive at a better understanding of language development

**Comparative Perspectives on Language Acquisition** Marzena Watorek, Sandra Benazzo, Maya Hickmann, 2012-01-09 This volume aims to provide a broad view of second language acquisition within a comparative perspective that addresses results concerning adult and child learners across a variety of source and target languages It brings together contributions at the forefront of language acquisition research that consider a wide range of open questions What are the precise mechanisms underlying acquisition How can we characterize learners initial state and predict their degree of final achievement What role do specific typological properties of source and target languages play How does fossilization occur How does the relative complexity of cognitive systems in adult and child learners affect acquisition Does language learning influence cognitive organization Can language learning shed light on our general understanding of human language and language processing

Sentence Processing: A Crosslinguistic Perspective Dieter Hillert, 1998-07-13 The

innovative element of this volume is its overview of the fundamental psycholinguistic topics involved in sentence processing. While most psycholinguistic studies focus on a single language and induce a general model of universal sentence processing, this volume proposes a cross-linguistic approach. It contains two distinct features first embraced in the 18th century by brothers Freiherr Wilhelm von Humboldt and Alexander von Humboldt. First, it offers a linguistic theory that characterizes universal cognitive features of the human language processor or the mind and its biological source independent of a single language structure. Second, it contains a language theory which considers the diversity of linguistic structures and provides a powerful theory of language processing. Contributors cover a wide range of topics including word recognition, fixed expressions, grammatical constraints, empty categories, and parsing. Their research involves analyses of 12 languages. This book provides an overview of central psycholinguistic topics in sentence processing and combines deductive and inductive methods in fashioning an innovative approach. The contributors address word recognition, fixed expressions, grammatical constraints, empty categories, and parsing. Its original papers form a coherent presentation.

**The Language of Memory in a Crosslinguistic Perspective** Mengistu Amberber, 2007-11-14. This book offers for the first time a detailed comparative study of how speakers of different languages express memory concepts. While there is a robust body of psycholinguistic research that bears on how memory and language are related, there is no comparative study of how speakers themselves conceptualize memory as reflected in their use of language to talk about memory. This book addresses a key question: how do speakers of different languages talk about the experience of having prior experiences coming to mind, remembering or failing to come to mind, forgetting? A complex array of answers is provided through detailed grammatical and semantic investigation of different languages including English, German, Polish, Russian, and also a number of non-Indo-European languages: Amharic, Cree, Dalabon, Korean, and Mandarin. In addition, the book calls for a broader interdisciplinary engagement by urging that cognitive semantics be integrated with other sciences of memory.

**Cross Linguistic Perspectives on Morphological Processing**, 2000. **Adult Language Acquisition: Volume 2, The Results** Clive Perdue, 1993-08-19. These two volumes present the methodology and results of an international research project on second language acquisition. The project studied the structure and success of the acquisition process in adult learners and the explanatory factors behind these phenomena. It places the study of second languages and inter-ethnic discourse on a firm empirical footing. Volume II summarizes the crosslinguistic results.

**The Learnability of Complex Constructions** Marcel Schlechtweg, 2020-08-10. How language users from different linguistic backgrounds cope with forms of complexity is still a territory with many unanswered questions. The current book is concerned with morphologically and syntactically complex items that is derivatives, inflected forms, compounds, phrases, and forms related by agreement, and examines how these constructions are acquired and learned in a great range of different languages such as Turkish, Welsh, Basque, and Catalan. Relying on a variety of methodologies targeting production or comprehension, among others, lexical decision and priming experiments, an EEG study, a corpus

analysis and a reading test the authors consider data from native speakers mastering one or more languages and second language users Overall the volume reflects upon and contributes to our understanding of how the peculiarities of language and its users affect the learnability of complex forms **The Quarterly Journal of Experimental Psychology** ,2002

Modeling Information Structure in a Cross-linguistic Perspective Sanghoun Song,2017-07-12 This study makes substantial contributions to both the theoretical and computational treatment of information structure with a specific focus on creating natural language processing applications such as multilingual machine translation systems The present study first provides cross linguistic findings in regards to information structure meanings and markings Building upon such findings the current model represents information structure within the HPSG MRS framework using Individual Constraints The primary goal of the present study is to create a multilingual grammar model of information structure for the LinGO Grammar Matrix system The present study explores the construction of a grammar library for creating customized grammar incorporating information structure and illustrates how the information structure based model improves performance of transfer based machine translation Acquisition of Second Language Syntax Susan Braid,2020-11-25 This book deals with the questions asked about the L2 acquisition process within different research paradigms examines the results found in each approach and evaluates the contributions of each to our understanding of L2 acquisition of syntax and to possible implications for L2 instruction **Crosslinguistic Perspectives on Argument Structure** Melissa Bowerman, Penelope Brown,2008 This book offers a unique interdisciplinary perspective on argument structure and its role in language acquisition The volume is the outcome of an integrated research project and comprises chapters by both specialists in first language acquisition and field linguists working on a variety of lesser known languages Drawing on a broad range of crosslinguistic data Crosslinguistic Perspectives on Argument Structure integrates important contemporary issues in linguistics and language acquisition **Clause Linkage in Cross-linguistic Perspective** Volker Gast, Holger Diessel,2012 The volume is a collection of thirteen papers given at the Third Syntax of the World s Languages conference complemented with four additional papers as well as an introduction by the editors All contributions deal with clause combining focusing on one or both of the following two dimensions of analysis properties of the clauses involved types of dependency The studies are data driven and have a cross linguistic or typological orientation In addition to survey papers the volume contains in depth studies of particular languages mostly based on original data collected in recent field work **Adult Language Acquisition: Volume 1, Field Methods** Clive Perdue,1993-07-30 These two volumes present the methodology and results of an international research project on second language acquisition by adult immigrants This project went beyond other studies in at least three respects in the number of languages studied simultaneously in the organisation of co ordinated longitudinal studies in different linguistic environments and in the type and range of linguistic phenomena investigated It placed the study of second languages and inter ethnic discourse on a firm empirical footing Volume 1 explains and evaluates

the research design adopted for the project Volume 2 summarises the cross linguistic results under two main headings native non native speaker interaction and language production Together they present the reader with a complete research procedure and in doing so make explicit the links between research questions methodology and results [Second Languages](#) Roger W. Andersen,1984 **Language** George Melville Bolling,Bernard Bloch,2005 **Encyclopedia of Language & Linguistics** E. K. Brown,2006 [Cross-Linguistic Aspects of Processability Theory](#) Manfred Pienemann,2005-12-14 Seven years ago Manfred Pienemann proposed a novel psycholinguistic theory of language development Processability Theory PT This volume examines the typological plausibility of PT Focusing on the acquisition of Arabic Chinese and Japanese the authors demonstrate the capacity of PT to make detailed and verifiable predictions about the developmental schedule for each language This cross linguistic perspective is also applied to the study of L1 transfer by comparing the impact of processability and typological proximity The typological perspective is extended by including a comparison of different types of language acquisition The architecture of PT is expanded by the addition of a second set of principles that contributes to the formal modeling of levels of processability namely the mapping of argument structure onto functional structure in lexical mapping theory This step yields the inclusion of a range of additional phenomena in the processability hierarchy thus widening the scope of PT [Cross-Linguistic Variation and Efficiency](#) John A. Hawkins,2014 This book argues that major patterns of variation across languages are structured by general principles of efficiency in language use and communication an approach that has far reaching theoretical consequences for issues such as ease of processing language universals complexity and competing and cooperating principles **Linguistics and Language Behavior Abstracts** ,2008-02
