Dr. Quake Warren Murphy, 1981 **CRISPR People** Henry T. Greely, 2022-03-01 What does the birth of babies whose embryos had gone through genome editing mean for science and for all of us In November 2018 the world was shocked to learn that two babies had been born in China with DNA edited while they were embryos as dramatic a development in genetics as the 1996 cloning of Dolly the sheep In this book Hank Greely a leading authority on law and genetics tells the fascinating story of this human experiment and its consequences Greely explains what Chinese scientist He Jiankui did how he did it and how the public and other scientists learned about and reacted to this unprecedented genetic intervention The two babies nonidentical twin girls were the first CRISPR'd people ever born CRISPR Clustered Regularly Interspaced Short Palindromic Repeats is a powerful gene editing method Greely not only describes He's experiment and its public rollout aided by a public relations adviser but also considers in a balanced and thoughtful way the lessons to be drawn both from these CRISPR'd babies and more broadly from this kind of human DNA editing germline editing that can be passed on from one generation to the next Greely doesn't mince words describing He's experiment as grossly reckless irresponsible immoral and illegal Although he sees no inherent or unmanageable barriers to human germline editing he also sees very few good uses for it other less risky technologies can achieve the same benefits We should consider the implications carefully before we proceed
