*Dreadful Sanctuary* Eric Frank Russell, 1951      *Think to New Worlds* Joshua Blu Buhs, 2024-07-03 This book is about Charles Fort his followers and the surprising influence they have had on science fiction the avant garde UFOlogy and more broadly on the role of spirituality and conspiracy in the modern world Fort was an author and maverick philosopher who wrote four non fiction books about anomalies rains of frogs mysterious disappearances unexplained lights in the sky for which he offered hypotheses that even he did not always accept as true His books developed into a monistic philosophy that denounced science as a machine for generating truth In his view science was a small part of a larger system in which truth and falsity were constantly transforming one into the other This was not a rejection of the modern world but instead its fulfillment Fort prophesied the next stage in intellectual evolution after the scientific era He inspired four overlapping groups members of the Fortean Society science fiction fans and writers avant garde artists and flying saucer enthusiasts First We Must Think to New Worlds takes up each of these groups in turn to ask How can the human imagination be expanded What is the fundamental structure of the universe And how does power move As they developed their responses Fort s followers mixed Forteanism with Fundamentalism New Agery and conspiracy as well as a host of other forms of modern enchantments such as the ironic imagination scientific wonder and Theosophical syncretism Each chapter is interrupted by and concludes with shorter sections that focus on particular Forteans or Fortean events as a way to deepen themes      **The Anticipation**
