the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a
variety of application areas The total of 251 contributions included in the UAHCI proceedings were carefully reviewed and
selected for inclusion in this four volume set The 51 papers included in this volume are organized in the following topical
sections design for all methods techniques and tools development methods and tools for universal access user models
adaption and personalization natural multimodal and multisensory interaction and brain computer interfaces **STEM the
Tide** David E. Drew, 2015-05 Proven strategies for reforming STEM education in America s schools colleges and universities
One study after another shows American students ranking behind their international counterparts in the STEM fields science
technology engineering and math Businesspeople and cultural critics such as Bill Gates warn that this alarming situation puts
the United States at a serious disadvantage in the high tech global marketplace of the twenty first century and President
Obama places improvement in these areas at the center of his educational reform What can be done to reverse this poor
performance and to unleash America s wasted talent David E Drew has good news and the tools America needs to keep
competitive Drawing on both academic literature and his own rich experience Drew identifies proven strategies for reforming
America s schools colleges and universities and his comprehensive review of STEM education in the United States offers a
positive blueprint for the future These research based strategies include creative and successful methods for building strong
programs in science and mathematics education and show how the achievement gap between majority and minority students
can be closed A crucial measure he argues is recruiting educating supporting and respecting America s teachers Accessible
engaging and hard hitting **STEM the Tide** is a clarion call to policymakers administrators educators and everyone else
concerned about students participation in the STEM fields and America s competitive global position [Las Vegas Access](#)
