## **Crisis And War:**

**Crisis and War** Patrick James, 1988-03-01 His analysis suggests that certain explanations have not been sufficiently considered in previous works For example prior domestic strife can be linked to the escalation of foreign conflict in an impressive number of cases a discovery which runs counter to the consensus which has emerged over the last two decades among political scientists Prior research on causes of war has often lacked rigour James has tried to remedy this through a long term comparative approach to the subject matter While *Crisis and War* follows the tradition of aggregate research statistical analysis is always connected to particular events through discussions of situations and leaders in both diplomatic history and contemporary world politics James comprehensive and original approach to past theories both clarifies and critiques them

**Between Peace and War** Richard Ned Lebow, 1981 Lebow has produced a significant work on international crises and their relationship to international politics His integration of history and international relations theory is particularly laudatory and he draws some important conclusions concerning deterrence theory and crisis management Jerel A Rosati *American Political Science Review*

**Avoiding War** Yaacov Bar-Siman-Tov, 1991-08-13 Drawing on 11 case studies beginning with the Crimean War and ending with the 1973 Mideast War this volume presents an ambitious analysis of crisis management The contributors analyze the role of factors such as intelligence bargaining rules and stress Throughout the volume they attempt to grapple with the central problem facing experts on superpower relations today how relevant is this kind of analysis to a post Cold War environment They conclude with possible future flashpoints recommendations for containing escalation and integrate the overall study s findings into existing theories of crisis behavior They also make a convincing case that there are valuable lessons to be learned from past U S Soviet crises An epilogue touches on the outbreak of the Gulf crisis in 1990 ISBN 0 8133 1232 9 59 95

**Preparing for War? Moscow Facing an Arc of Crisis** Andrew Monaghan, Consultant Oral and Maxillofacial Surgeon Andrew Monaghan, PH D, Strategic Institute, U. S. Army College Press, 2017-03-15 Russia is once again at the front and center of the security agenda of the United States With many now seeing Russia as one of the most important threats if not the number one threat to the United States and its allies there is much debate about how to counter possible threats where Russia might strike next and how to deter Russian aggression The war in Ukraine and Russia s intervention in Syria combined with its extensive program of exercising for war lends policy urgency to this debate In this Letort Paper Dr Andrew Monaghan a British academic and long term scholar of Russia based at Chatham House in London reflects on the view from Moscow In so doing he illustrates the increasingly obvious gulf in how security is perceived in Western capitals and in Moscow Importantly he emphasizes that the Russian leadership faces numerous doubts and difficulties to include doubting that in Clausewitzian terms Russia is able to withstand the test of war This is both the root of the emergency measures that

the Russian leadership is implementing across the system from the economy to the political system and the military and the root of the major investment program to modernize the military that was under way even before the Ukraine crisis erupted in 2014 and led to a sharp deterioration in Russia's relations with the United States and the West more broadly This Letort Paper also serves to complement and even supersede the debate in the West about Russian hybrid war by looking at Russian actions through the lens of state mobilization drawing attention to important features of Russia's evolving conventional warfighting capacity
