Universal Classic Monsters - 100th Anniversary Scott Essman, 2012-10-02 A retrospective of Universal Pictures classic monster cycle of films for the studio's 100th anniversary. *Classic Horror Films and the Literature That Inspired Them* Ron Backer, 2015-05-11 Classic horror films such as *Dracula*, *Frankenstein*, and *The Picture of Dorian Gray* are based on famous novels. Less well-known even to avid horror fans are the many other memorable films based on literary works. Beginning in the silent era and continuing to the present, numerous horror films found their inspiration in novels, novellas, short stories, and poems, though many of these written works are long forgotten. This book examines 43 works of literature from the famous to the obscure that provided the basis for 62 horror films. Both the written works and the films are analyzed critically with an emphasis on the symbiosis between the two. Background on the authors and their writings is provided.

Classic Horror Anne DeLong, 2018-06-15 A valuable resource for readers exploring the classic horror genre, this book presents primary source documents alongside analysis in an examination of the social, political, and economic factors reflected in 19th-century Gothic literature. The nineteenth century was a time of social, cultural, and economic change, revolutionary scientific developments, and enduring imaginative works. This book explores the classic horror genre of Gothic literature in its historical and social contexts. It contains chapters on four major works of classic horror, with each chapter providing a mix of background information, primary source, historical documents, and analysis that will appeal as much to high school and college students as to lovers of literature and the Victorian era. Coleridge's *The Rime of the Ancient Mariner* is contextualized through documents pertaining to British imperialism, Antarctic Exploration, and the burgeoning environmentalist movement. Shelley's *Frankenstein* is explored through sections on galvanism, electricity, grave robbing, and the vitalist debate. Stevenson's *The Strange Case of Dr. Jekyll and Mr. Hyde* is read through explanations of nineteenth-century drug use and addiction and early theories of psychology and criminology. Stoker's *Dracula* is studied with reference to such

Iaccino,1994-06-30 In this examination of the psychology of terror Iaccino uses Jungian archetypes to analyze significant works in the horror film genre In the past Jungian archetypes have been used to interpret mythologies to examine great works of literature and to explain why sexual stereotypes persist in our society Here for the first time Iaccino applies such models as the Cursed Wanderers the Warrior Amazons the Random Destroyers and the Techno Myths to highlight recurrent themes in a wide range of films from early classics such as *Nosferatu* to the contemporary *Nightmare on Elm Street* and *Alien* series With this innovative approach Iaccino gains a new perspective on the psychology of the often powerful compulsion to be scared **Nosferatu (1979)** S.S. come near yours in originality or terror A popular bestseller in Victorian England Stoker s hypnotic tale of the bloodthirsty Count Dracula whose nocturnal atrocities are symbolic of an evil ages old yet forever new endures as the quintessential story of suspense and horror The unbridled lusts and desires the diabolical cravings that Stoker dramatized with such mythical force render Dracula resonant and unsettling a century later
