Drawings By Architects:

Architect's Drawings Kendra Schank Smith, 2006-08-11 The sketch is a window into the architect's mind. As creative designers, architects are interested in how other architects, particularly successful ones, think through the use of drawings to approach their work. Historically, designers have sought inspiration for their own work through an insight into the minds and workings of people they often regard as geniuses. This collection of sketches aims to provide this insight. Here, for the first time, a wide range of world-famous architects' sketches from the Renaissance to the present day can be seen in a single volume. The sketches have been selected to represent the concepts or philosophies of the key movements in architecture in order to develop an overall picture of the role of the sketch in the development of architecture. The book illustrates the work of designers as diverse as Andrea Palladio, Erich Mendelsohn, Sir Edwin Lutyens, Gianlorenzo Bernini, Le Corbusier, Michelangelo, Alvaro Siza, Sir John Soane, Francesco Borromini, Walter Gropius, and contemporary architects Tadao Ando, Zaha Hadid, and Frank Gehry, to name a few. Each chronologically placed sketch is accompanied by text providing details about the architect's life, a look at the sketch in context, and the connection to specific buildings where appropriate. Style, media, and meaning are also discussed, developing an explanation of the architect's thinking and intentions. As creative designers themselves, architects are interested in how other architects, particularly successful ones, think and draw and approach their work. Historically, designers have sought inspiration for their own work through an insight into the minds and workings of people they often regard as geniuses. This collection of sketches aims to provide this insight. Listed chronologically, each sketch will be accompanied by a text which provides a short synopsis, history of the architect's life, a look at the sketch in this context, the connection to a specific building where appropriate, techniques of the sketch, style, and media, meaning, what the sketch shows about the architect's thinking and intentions, followed by a select bibliography for each section.

Drawing After Architecture Carolyn Yerkes, 2017 Why did early modern architects continue copying drawings long after the invention of print should have made such copying obsolete? Carolyn Yerkes answers that question in a fresh investigation into the status of architectural drawing in the 16th and 17th centuries. *Drawing after Architecture: Renaissance Drawings and their Reception* investigates the status of architectural drawing after the invention of print and explores a vast group of 16th and 17th-century manuscripts and collections of drawings that are each part of a larger network of copies made by French and Italian draftsmen who studied Roman monuments. The drawings contain information about the buildings, buildings that include the most important ancient and modern works, the Pantheon and Saint Peter's, that is not known from any other sources. But the information that the drawings preserve is only part of their value; the drawings also show how that information was recorded, transferred, and analysed by other draftsmen. In the 16th century, survey drawing was the key mechanism through which the material past was understood, and many 16th and 17th-century drawings of ancient architecture are extant. Ultimately, this book pursues the nature of architectural evidence in that it asks how Renaissance

architects used images to explore structures to create biographies and to write history *Stories from Architecture* Philippa Lewis, The imagined histories of twenty five architectural drawings and models told through reminiscences stories conversations letters and monologues Even when an architectural drawing does not show human figures we can imagine many different characters just off the page architects artists clients builders developers philanthropists working observing admiring arguing In *Stories from Architecture* Philippa Lewis captures some of these untold stories offering the imagined histories of twenty five architectural drawings and models Through reminiscences anecdotes conversations letters and monologues from the factual including Frank Lloyd Wright s correspondence with a Wisconsin librarian to the fictional including a penurious nineteenth century draftsman who draws the Burlington Arcade for financial survival Lewis provides the human context for these works Some of the people Lewis writes about are famous Wright Richard Neutra Marc Brunel Horace Walpole among others but many are not There s a young woman who flirts with a handsome young fellow inexplicably drawing an old wall and trees on the site of a defunct smallpox hospital a teenager who looks at the plans for a gadget filled bachelor pad in *Playboy* magazine dreaming of a life away from parental supervision and that Wisconsin librarian who commissions Wright to build a house for 5 500 The works reproduced in color are all from the Drawing Matter archive They are fascinating objects in themselves but Lewis shifts our attention beyond the drawing to other possible histories that linger invisible on the page animating not just a series of archival documents but the writing of architectural history
