**Museum and Gallery Publishing** Sarah Hughes, 2019-06-20 Museum and Gallery Publishing examines the theory and practice of general and scholarly publishing associated with museum and art gallery collections Focusing on the production and reception of these texts the book explains the relevance of publishing to the cultural commercial and social contexts of collections and their institutions Combining theory with case studies from around the world Sarah Anne Hughes explores how why and to what effect museums and galleries publish books Covering a broad range of publishing formats and organisations including heritage sites libraries and temporary exhibitions the book argues that the production and consumption of printed media within the context of collecting institutions occupies a unique and privileged role in the creation and communication of knowledge Acknowledging that books offer functions beyond communication Hughes argues that this places books published by museums in a unique relationship to institutions with staff acting as producers and visitors as consumers The logistical and ethical dimensions of museum and gallery publishing are also examined in depth including consideration of issues such as production the impact of digital technologies funding and

**The College Handbook**, 1992 **The Hegemon's Tool Kit** Rebecca Davis Gibbons, 2022-07-15 At a moment when the nuclear nonproliferation regime is under duress Rebecca Davis Gibbons provides a trenchant analysis of the international system that has for more than fifty years controlled the spread of these catastrophic weapons The Hegemon's Tool Kit details how that regime works and how disastrously it might falter In the early nuclear age experts anticipated that all technologically capable states would build these powerful devices That did not happen Widespread development of nuclear arms did not occur in large part because a global nuclear nonproliferation regime was created By the late 1960s the United States and the Soviet Union had drafted the Treaty on the Non Proliferation of Nuclear Weapons NPT and across decades the regime has expanded with more agreements and more nations participating As a result in 2022 only nine states possess nuclear weapons Why do most states in the international system adhere to the nuclear nonproliferation regime The answer lies Gibbons asserts in decades of painstaking efforts undertaken by the US government As the most powerful state during the nuclear age the United States had many tools with which to persuade other states to join or otherwise support nonproliferation agreements The waning of US global influence Gibbons shows in The Hegemon's Tool Kit is a key threat to the nonproliferation regime So too is the deepening global divide over progress on nuclear disarmament To date the Chinese government is not taking significant steps to support the nuclear nonproliferation regime and as a result the regime may face a harmful leadership gap
