CT- and MR-Guided Interventions in Radiology Andreas H. Mahnken, Jens Ricke, 2008-10-30 Percutaneous image guided interventions are a well established and effective tool in clinical routine These include percutaneous biopsies drainage pain management as well as complex techniques for tumour ablation Interventional radiology is a demanding subject that requires well trained medical professionals This book covers indications materials and execution of the most important image guided interventions A combination of detailed descriptions and figures comprehensively describes how to perform the wide variety of interventions Moreover this book is also suited as a reference for interventional radiologists Radiology ,1925 **The American Journal of Electrotherapeutics and Radiology** ,1922 *Journal of Radiology* ,1922 *Subject Guide to Books in Print* ,1991 **Archives of Radiology and Electrotherapy** ,1919 **Hyperspectral Imaging Technology in Food and Agriculture** Bosoon Park, Renfu Lu, 2015-09-29 Hyperspectral imaging or imaging spectroscopy is a novel technology for acquiring and analysing an image of a real scene by computers and other devices in order to obtain quantitative information for quality evaluation and process control Image processing and analysis is the core technique in computer vision With the continuous development in hardware and software for image processing and analysis the application of hyperspectral imaging has been extended to the safety and quality evaluation of meat and produce Especially in recent years hyperspectral imaging has attracted much research and development attention as a result rapid scientific and technological advances have increasingly taken place in food and agriculture especially on safety and quality inspection classification and evaluation of a wide range of food products illustrating the great advantages of using the technology for objective rapid non destructive and automated safety inspection as well as quality control Therefore as the first reference book in the area *Hyperspectral Imaging Technology in Food and Agriculture* focuses on these recent advances The book is divided into three parts which begins with an outline of the fundamentals of the technology followed by full covering of the application in the most researched areas of meats fruits vegetables grains and other foods which mostly covers food safety and quality as well as remote sensing applicable for crop production *Hyperspectral Imaging Technology in Food and Agriculture* is written by international peers who have both academic and professional credentials with each chapter addressing in detail one aspect of the relevant technology thus highlighting the truly international nature of the work Therefore the book should provide the engineer and technologist working in research development and operations in the food and agricultural industry with critical comprehensive and readily accessible information on the art and science of hyperspectral imaging technology It should also serve as an essential reference source to undergraduate and postgraduate students and researchers in universities and research institutions Medical Imaging ,1997 **Intraoperative Imaging, An Issue of Neurosurgery Clinics of North America** J.
