Basic Pre-Med Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student. Materials for each semester are independent of one another to allow flexibility. Semester 1: Microbiology. As the world waits in fear, world health organizations race to develop a vaccine for the looming bird flu epidemic, a threat that has forced international, federal, and local governments to begin planning for a possible pandemic and the widespread death and devastation which would follow. Will the world find an answer in time? Or will we see this threat ravage populations as others have before? In 1918, with influenza in the late 18th century with yellow fever or the horrific black death or bubonic plague in 1347 AD, are these viruses examples of evolution? Did God make microbes by mistake? Are they accidents of evolution out of the primordial soup? These timely questions are examined throughout *The Genesis of Germs*. It seems that a new and more terrible disease is touted on the news almost daily. The spread of these scary diseases from bird flu to SARS to AIDS is a cause for concern and leads to questions such as: Where did all these germs come from and how do they fit into a biblical world view? What kind of function did these microbes have before the Fall? Does antibiotic resistance in bacteria prove evolution? How can something so small have such a huge deadly impact on the world around us? Professor Alan Gillen sheds light on these and many other questions in this revealing and detailed book. He shows how these constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world view. Dr. Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ. Semester 2: Life Science Study. Clear biological answers for how science and Scripture fit together to honor the Creator. Have you ever wondered about such captivating topics as genetics, the role of natural selection, embryonic development, or DNA and the

magnificent origins of life Within Building Blocks in Life Science you will discover exceptional insights and clarity to patterns of order in living things including the promise of healing and new birth in Christ Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years The evolutionary worldview can be found filtered through every topic at every age level in our society It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions This dynamic education resource helps young people not only learn science from a biblical perspective but also helps them know how to defend their faith in the process
