Neil Barrett,1997 Getting your message across on the World Wide Web   *Internet Advertising and Sales* Laura S. Ilves,2011 Many website operators produce income by selling advertising space on their sites Advertisers will pay a premium for ads that are more likely to reach their target demographic In other media such as broadcasting advertisers engage in targeting by purchasing advertising time during programs that those who buy their products are most likely to watch The Internet presented new challenges and opportunities for advertisers because rather than aiming their ads at groups of people who visit a particular site their ads are aimed at the individual user This maximises the odds that the user who sees the ad will be interested in the product or service it touts This book explores today s current issues in Internet advertising and sales   *Internet Advertising and Promotion* Jerry Graham,Lynne Lee,2011-09-24 Over the last 10 years or so the Internet has become more and more ingrained in our daily lives People use the Internet to search for almost everything including local businesses and other local information With the explosive growth of smartphones this rush to the Internet for information is clearly accelerating The question you must ask yourself is When someone is looking for the products services I offer and they look on their smartphone or on their computer can they find me If the answer is no or even if the answer is I have a website but it s not bringing me any new customers then this book full of free Internet Advertising ideas is for you The bottom line is that if you re not on page 1 of a Google search for your product or service you are virtually invisible If you re still relying on your very expensive ad in the Yellow Pages to bring you new customers you ve undoubtedly noticed a sharp drop off in effectiveness over the last several years There is a concern that the cost of Internet advertising is prohibitive and that only the major corporations can play that game and win The truth is just the opposite More and more the big boys are falling off of page 1 as Google continues to move toward their local search strategy Internet advertising marketing is rapidly becoming the media of choice especially for small local businesses This book describes many of the things that you need to be aware of when marketing on the web as well as some of the ways that you can not only reach new customers but get your existing customers to spend more money with you and do it more often Within this book you will find information such as Why mobile marketing is important and how to have a great mobile site How social media is changing things up and how to have a great social media strategy Facebook Ads Best Practices How to make use of review sites like Yelp and CitySearch Things a site absolutely must have to be optimized for success And a LOT more   Internet Advertising David W. Schumann,Esther Thorson,Shelly Rodgers,2012 Building on the research presented in their previous edition Advertising and the World Wide Web 1999 editors David W Schumann and Esther Thorson offer the expertise of active scholars in the area of Internet advertising in this new volume and allow readers to reflect on the ever changing nature of the Internet Internet Advertising marks this important point in history taking into account the state of practice theoretical conceptualizations empirical research creative typologies and potential considerations Nearly all chapters are in the form of integrated reviews of theory and research which provide a source of both previous knowledge as well as future focus for advertising strategy The volume

is arranged in four sections covering the foundations of Internet advertising theory consumer response to Internet advertising topical areas in which Internet advertising has significant influence on the consumer human needs and trends that will likely have significant impact on the future of Internet advertising This contemporary analysis of Internet advertising will appeal to all practitioners and students of the Internet and will effectively suit courses taught in this area
