**Aesthetic Dimensions of Religious Education** Gloria Durka,Joanmarie Smith,1979-01-01      **The Aesthetic Dimension in Redefining Religious Education** Maria Harris,1971 ABSTRACT      *International Handbook of the Religious, Moral and Spiritual Dimensions in Education* Marian de Souza,Gloria Durka,Kathleen Engebretson,Robert Jackson,Andrew McGrady,2007-06-04 Traditionally spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world spirituality is perceived by some as an aspect of human life that is distinct from religion Consequently many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion One outcome is the renewed interest in the religious spiritual and moral dimensions of education throughout the life cycle This International Handbook presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education The result is a collection of essays which reflects the discipline in all of its internationality as it as today Embedded within the chapters is also an agenda for the future where the religious moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society As well it offers a vision for the emergence of a peaceful and just world

**Global Perspectives on Catholic Religious Education in Schools** Michael T. Buchanan,Adrian-Mario Gellel,2015-10-05 This book covers theoretical aspects of Catholic Religious Education in schools and examines them from multiple theoretical and contextual perspectives It captures the contemporary academic and educational developments in the field of Religious Education while discussing in detail the challenges that Religious Educators face in different European Asian African Australian American and Latin American countries The edited collection investigates how to pass on a Catholic heritage as a living tradition in diversely populated schools and communities In this way it explores and asserts the proper identity of Catholic Religious Education in dialogue with Catechetics and with the wider discipline of Religious Education As the different articles of this publication demonstrate through a series of interesting and critical points of view Catholic Religious Education is confronted with many challenges from the risk of marginalization to the confusion produced by a religious indifferentism leading to a strictly comparative or neutral method in the study of religions It is essential to take into account in our research perspectives that Catholic Religious Education is not only a subject but also a mission in the light of the diakonia of truth in the midst of humanity H E Cardinal Zenon Grocholewski Prefect Congregation for Catholic Education Holy See Vatican City Religious education teachers cannot by themselves overcome the ills of society but religious education can help to create better citizens of the world as some authors argue throughout this collection could not ask more from such timely and provocative collection It is a gift to the profession and to Catholic Religious Education Prof Gloria Durka Fordham University New York NY USA      *And We Shall Learn through the Dance* Kathleen S. Turner,2021-07-28 Liturgical dance is a

way to present reflect instruct learn study and share religious beliefs with one's self within one's worship community and with one's God. Such a belief is confirmed and witnessed within a variety of religious settings throughout the world from the beginning of time to this present age. However, there is a vacuum of resources that connect liturgical dance within the Christian context as a tool for religious learning within the field of religious education. With the continual rise of liturgical dance as an artistic form of expression, this book proposes that liturgical dance offers unique attributes conducive to the teaching and learning of faith and to faith formation. Kathleen S. Turner shows how liturgical dance is religious education in two very important ways: first by addressing the power and potential liturgical dance has in nourishing the faith life of Christian congregants through means that are both educative and reflective, and second by giving examples of how liturgical dance can be implemented as a religious education tool within the teaching life of the church.

**Christian Education: Its History and Philosophy** Kenneth O. Gangel, Warren S. Benson, 2002-03-05. A history of Christian education must not be confused with a record of the achievements of the Sunday School. The discipline has advanced well beyond that stage and today's sophisticated students fully understand that no proper concept of the history and philosophy of Christian education can be gained without seeing all the ramifications, implications, and influences that have affected it from pre-Christian times to the present. So Drs. Gangel and Benson have written this book, a historical flow of philosophical thought from a Christian point of view. Its focus is cultural biographical, discussing each philosophy in its particular socio-historical setting and giving special attention to significant individuals. The format is chronological, beginning with education in biblical times, working upward through history to arrive at the present and beyond, raising questions and issues for the future. **Routledge**

**Library Editions: Christianity** Various Authors, 2022-07-30. Originally published between 1926 and 1986, the books in this series provide an extensive exploration of Christianity, covering a wide range of different perspectives and topics, including the relationship between Christianity and other religions, the history and development of Christianity, Christian theology and philosophy, the presence of Christianity across the world, women and the Church, approaches to the study of Christianity, and poetry inspired by religious architecture.

**Schools and the politics of religion and diversity in the Republic of Ireland** Karin Fischer, 2016-09-01. This book focuses on the historical and current place of religion in the Irish education system from the perspective of children's rights and citizenship. It offers a critical analysis of the political, cultural, and social forces that have shaped the system, looking at how the denominational model has been adapted to increased religious and cultural diversity in Irish society and showing that recent changes have

failed to address persistent discrimination and the absence of respect for freedom of conscience It relates current debates on the denominational system and the role of the State in education to competing narratives of national identity that reflect nationalist communitarian or republican political outlooks This book will be essential reading for students and researchers in the fields of education policy and Church State relations in Ireland and will also engage non academic audiences with an interest or involvement in Irish education      **Religious Education and the Creative Arts** Derek H.
