## **Afa Tables Of Houses:**

AFA Tables of Houses Astro Numeric Service, American Federation of Astrologers, 1977 This compilation of house cusps is an authoritative reference for the accurate division of the zodiac into twelve houses Designed to meet the most demanding needs of astrologers and those doing astrological research the tables cover the range of latitudes from 0 to 66 degrees and list all cusps to one tenth of a minute of arc The tables list the cusps at even four minute intervals of sidereal time making linear interpolation practical and straightforward There are 360 separate tables of house cusps with each showing the house cusps for latitudes 0 to 66 degrees at a single value of sidereal time At the top of each table the sidereal time is printed in hours minutes and seconds on the left and in degrees minutes and seconds on the right Since the Midheaven remains the same for all latitudes it is printed once at the top of the page and because of its importance is listed to a precision of one second of arc The general rule for finding southern latitude cusps is to add twelve hours to the sidereal time look up the cusps as if the latitude were north and then reverse the zodiacal sign of all the cusps found This process is made easier in this volume through the use of separate headings for southern latitudes at the bottom of each table Instead of adding twelve hours to the sidereal time use the sidereal time headings at the bottom of the page when locating the proper table This gives the same table that would be found by adding the twelve hours and using the northern latitude headings It is usually necessary to interpolate to find cusps for an exact time or latitude that falls between two listings in the tables Interpolation is the process of finding a small correction to be added or subtracted from a cusp in the tables to compensate for the difference between the value of the cusp at the listed sidereal time or latitude and the value of the cusp at the actual sidereal time or latitude Generally speaking interpolation must be done twice for each cusp a correction for the sidereal time and another for the latitude The Midheaven need only be corrected for sidereal time since it remains the same at all latitudes It is no surprise that the difficulty of interpolation depends upon the accuracy required Included in this book are explicit instructions for three techniques for finding the house cusps each of which gives successively more accurate results All tables needed for all three techniques are included in the book *AFA Tables of Houses* ,1977 Afa Tables of Houses ,1977-06-01 **AFA Tables of Houses** ,1977 AFA Tables of Houses Astro Numeric Service,1977 Astrology Madeline Gerwick-Brodeur,2020-06-09 Become enlightened and find out how your stars align When it comes to translating astrological signs and symbols into real world wisdom your ignorance is off the charts But don't worry things will start looking up once you've brushed up on the basics and learned how to interpret the stars And *The Awakened Life Astrology* will show you how This brand new edition offers a comprehensive history of astrology instructions on how to interpret your birth chart a reference guide for signs planets and houses a unique breakdown of the concept of synastry and even insightful tips on how astrology can help you with money and personal relationships Discover the signs how they relate to one another and how you can incorporate your newfound astrological knowledge into your everyday life *Royal Genealogies: Or, The Genealogical*
