Aesthetics And Environment:

The Aesthetics of Environment Arnold Berleant, 2010-06-10 An engaging discussion of environment as aesthetic experience

Living in the Landscape Arnold Berleant, 1997 In *Living in the Landscape* Arnold Berleant explores new ways of thinking about how we live and might live in the landscapes that enfold us Through the concepts of aesthetic engagement and environmental continuity he proposes a new paradigm that offers a holistic approach to the meaning of place and places of meaning in our lives Although environmental aesthetics is linked in the popular mind to dramatic vistas and monumental landscapes the Grand Canyon for example Berleant is much more concerned with the commonplace settings of everyday life He argues that our active appreciation of or aesthetic engagement with the prosaic landscapes of home work local travel and recreation plays a vital role in our discovery of hidden continuities as well as pleasure and meaning in the places we inhabit Berleant begins with a general introduction to environmental aesthetics identifying the kinds of experience meanings and values it involves and describing its historical sources and the issues with which it is concerned In the rest of the book he spotlights new directions in the field as they relate to education community creativity and the sacred and provides an insightful analysis of negative environmental aesthetics Throughout he is both thoughtful and entertaining as evidenced in his extended critique of the pop post modern environment of Disney World Berleant addresses issues commonly associated with the environmental movement e g preservation pollution control and quality of life But his study draws from a wide range of disciplines and for that reason should also appeal to scholars and students interested in art and aesthetics landscape architecture and planning urban and environmental design and cultural geography as well as environmental studies

Nature and Landscape Allen Carlson, 2009 The roots of environmental aesthetics reach back to the ideas of eighteenth century thinkers who found nature an ideal source of aesthetic experience Today having blossomed into a significant subfield of aesthetics environmental aesthetics studies and encourages the appreciation of not just natural environments but also human made and human modified landscapes *Nature and Landscape* is an important introduction to this rapidly growing area of aesthetic understanding and appreciation Allen Carlson begins by tracing the development of the field's historical background and then surveys contemporary positions on the aesthetics of nature such as scientific cognitivism which holds that certain kinds of scientific knowledge are necessary for a full appreciation of natural environments Carlson next turns to environments that have been created or changed by humans and the dilemmas that are posed by the appreciation of such landscapes He examines how to aesthetically appreciate a variety of urban and rural landscapes and concludes with a discussion of whether there is in general a correct way to aesthetically experience the environment

Aesthetics beyond the Arts Arnold Berleant, 2016-03-23 Taking the view that aesthetics is a study grounded in perception the essays in this volume exhibit many sides of the perceptual complex that is the aesthetic field and develop them in different ways They reinvigorate our understanding of such arts as music and architecture they range across the

natural landscape to the urban one they reassess the place of beauty in the modern environment and reassess the significance of the contributions to aesthetic theory of Kant and Dewey and they broach the kinds of meanings and larger understanding that aesthetic engagement with the human environment can offer Written over the past decade these original and innovative essays lead to a fresh encounter with the possibilities of aesthetic experience one which has constantly evolved moving in recent years in the direction of what Berleant terms social aesthetics which enhances human environmental integration and sociality *The Aesthetics of Natural Environments* Allen Carlson, Arnold

Berleant, 2004-02-10 *The Aesthetics of Natural Environments* is a collection of essays investigating philosophical and aesthetics issues that arise in our appreciation of natural environments The introduction gives an historical and conceptual overview of the rapidly developing field of study known as environmental aesthetics The essays consist of classic pieces as well as new contributions by some of the most prominent individuals now working in the field and range from theoretical to applied approaches The topics covered include the nature and value of natural beauty the relationship between art appreciation and nature appreciation the role of knowledge in the aesthetic appreciation of nature the importance of environmental participation to the appreciation of environments and the connections between the aesthetic appreciation of nature and our ethical obligations concerning its maintenance and preservation This volume is for scholars and students focussed on nature landscapes and environments individuals in areas such as aesthetics environmental ethics geography environmental studies landscape architecture landscape ecology and the planning and design disciplines It is also for any reader interested in and concerned about the aesthetic quality of the world in which we live **Aesthetics of the Natural Environment** Emily Brady, 2003 Aesthetic experience is one of the fundamental ways that we develop a relationship to our natural surroundings Emily Brady provides a comprehensive study of this type of experience and the central philosophical issues related to it developing her own original theory of aesthetic appreciation of nature She provides useful background to the current debate and an up to date critical appraisal of contemporary theories **Aesthetics and the Environment** Allen

Carlson, 2000 This book presents fresh and fascinating insights into our interpretation of the environment and shows how our aesthetic experience encompasses nature rather than art **Aesthetics and Environment** Arnold Berleant, 2017 The essays collected in *Aesthetics and Environment* comprise a set of variations on art and culture guided by the theme of environment The essays deal with the physical reality of environment such as the city the shore the water and the garden but also with the virtual environment and the social one Environmental aesthetics is a theme whose variations are as endless as the possibilities of the human performers and conditions from which it is fashioned This enticing set of essays testifies to Berleant's special talent in moving easily between both natural and human environments and opens out the contemporary discussion beyond that of the wilderness to the cultural and social environment Berleant argues that neither the natural nor human environment stands alone and both are best understood as distinctions that are in experience coextensive that one

can only speak of environment in relation to human experience The theme of this book is that such experience suffuses the so called natural world and shapes the human world It maintains the idea that in as much as people are embedded in these worlds relationships including human relationships are part of them The melding of these two worlds leads Berleant to defend ultimately what he has termed social aesthetics Provided by publisher **The Aesthetics Of Human**

Environments Arnold Berleant, Allen Carlson, 2007-05-24 The Aesthetics of Human Environments is a companion volume to Carlson's and Berleant's The Aesthetics of Natural Environments Whereas the earlier collection focused on the aesthetic appreciation of nature The Aesthetics of Human Environments investigates philosophical and aesthetics issues that arise from our engagement with human environments ranging from rural landscapes to urban cityscapes Our experience of public spaces such as shopping centers theme parks and gardens as well as the impact of our personal living spaces on the routine activities of our everyday life are discussed in terms of their aesthetic value and the nature of our aesthetic appreciation This volume will appeal to any reader concerned about the aesthetic quality of the world in which we live **Environmental**

Aesthetics Martin Drenthen, Jozef Keulartz, 2014-02-03 Environmental aesthetics crosses several commonly recognized divides between analytic and continental philosophy Eastern and Western traditions universalizing and historicizing approaches and theoretical and practical concerns This volume sets out to show how these perspectives can be brought into conversation with one another The first part surveys the development of the field and discusses some important future directions The second part explains how widening the scope of environmental aesthetics demands a continual rethinking of the relationship between aesthetics and other fields How does environmental aesthetics relate to ethics Does aesthetic appreciation of the environment entail an attitude of respect What is the relationship between the theory and practice The third part is devoted to the relationship between the aesthetics of nature and the aesthetics of art Can art help save the Earth The final part illustrates the emergence of practical applications from theoretical studies by focusing on concrete case studies

Nasar, 1992-07-31 How do people react to the visual character of their surroundings What can planners do to improve the aesthetic quality of these surroundings Too often in environmental design visual quality aesthetics is misunderstood as only a minor concern dependent on volatile taste and thus undefinable Yet a substantial body of research indicates the importance of visual quality in the environment to the public and has uncovered systematic patterns of human response to visual attributes of the built environment Efforts to understand environmental aesthetics have been undertaken by investigators from such diverse fields as landscape architecture environmental psychology geography philosophy architecture and city planning As a result the relevant information is scattered and not readily available to professionals and policy makers The book brings together classic and new contributions by distinguished workers in different disciplines It explores theory and data on preferences in the visual environment and also addresses the practical application of aesthetic criteria in design planning and public policy Promising directions for future research are identified Art And Engagement Arnold Berleant, 2010-06-18 A new aesthetic theory based on aesthetic perception and participation with the arts *The Art of Environmental Law* Benjamin J Richardson, 2019-12-12 Environmental law has aesthetic dimensions Aesthetic values have shaped the making of environmental law and in turn such law governs many of our nature based sensory experiences Aesthetics is also integral to understanding the very fabric of environmental law in its institutions procedures and discourses

The Art of Environmental Law the first book of its kind brings new insights into the importance of aesthetic issues in a variety of domains of environmental governance around the world from climate change to biodiversity conservation It also argues for aesthetics and relatedly the arts to be taken more seriously in the practice of environmental law so as to improve our emotional and ethical capacities to address the upheavals of the Anthropocene *Between Nature and Culture* Emily Brady, Isis Brook, Jonathan Prior, 2018-10-26 Within philosophy a new interest in aesthetics beyond the arts has encouraged the rapid growth of environmental aesthetics Within this literature however less attention has been given to the spaces and places that emerge from various nature culture interactions This has meant the relative neglect of types of environments to which the majority of people have access and interact with in a sustained manner In this respect these are the environments in which many of us understand and value nature Through a greater understanding of how humans interact with these environments and the types of relationships that emerge through this interaction we address seek to address this gap *Between Nature and Culture* provides a systematic philosophical account of the main issues and problems that pertain to the aesthetics of modified environments as well as new insights concerning the generation and appreciation of landscapes and environments that fall between non human nature and human culture including gardens agricultural and ecologically restored landscapes and land and ecological art works
