Affirming The Comprehensive Ideal:

Affirming the Comprehensive Ideal Richard Pring, Geoffrey Walford, 2021-04-29 Examines the ideals which lay behind the development of comprehensive schools Written by 14 British educationalists this text considers the evidence and suggests how further progress might be made within the moral framework of secondary education for all irrespective of background or ability The text includes an afterword by the Rt Hon John Prescott MP Deputy Leader of the Labour Party *School Effectiveness for Whom?* Roger Slee, Sally Tomlinson, Gaby Weiner, 2003-05-20 School effectiveness research together with what is now described as the school improvement movement Barber 1996 has captured both the Conservative and New Labour imaginations as a basis for educational planning and policy making in the UK Internationally school effectiveness enjoys and expanding and enthusiastic audience This book provides a critique of this research genre particularly in the light of the recent calls for teaching to go back to the basics The editors argue that this school effectiveness research is simplistic in its analysis of educational problems Far from getting to the bottom of the problem of failing students and schools they argue these movements are merely scratching at the surface of the problems and coming up with notions for superficial improvements **Education, Reform and the State** John Furlong, Robert Phillips, 2002-11 This book supplies the definitive contemporary history of education policy in the late twentieth century Some of the leading educationalists reflect on the major legislative and structural changes in the field over the last 25 years **Modern Educational Myths** O'Hagan, Bob, 2013-04-15 Focusing on some of the fallacies in the education system in the UK the contributors to this text dissect controversial topics including are higher pass rates the key to success is school really a community does good management create a good school and can A levels survive *Failing the Ordinary Child?* Gary McCulloch, 1998 In seeking to answer these questions this book explores working class secondary education over the past century in terms that help to explain the unresolved issues and debates of the 1990s It focuses on social distinctions in secondary education and especially on initiatives designed to provide for the mass of the population or the ordinary child These initiatives culminated in the secondary modern schools which only a generation ago were the main providers of secondary education in England and Wales The book discusses general social and historical issues relating to working class secondary education and the emergence of the idea in the late nineteenth century It examines the experiment of the Secondary Modern schools in detail to appraise the reasons for their rise their successes and their ultimate failure It also pursues the underlying theme of differentiation in secondary education since the 1960s its continuing influence despite the spread of comprehensive schools over that time and its role in the educational and social debates at the end of the century *International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences*, 1999

Engaging Teachers Trevor Gale, Kathleen Mary Densmore, 2003 Engaging Teachers makes a deliberate attempt to reclaim the education discourse captured by new right politics and connect it with a radical democratic agenda for schooling

On its agenda are education markets policy leadership professionalism and communities Engaging with these is conceived on at least two levels First as an invitation to teachers to become involved in reconstructing schooling for socially just purposes and in democratic ways From this perspective the politics of engagement is not simply a matter of acquiescence or resistance but is informed by a commitment to genera

Deconstructing Special Education and Constructing Inclusion Gary Thomas, Andrew Loxley, 2001 In this book the authors look behind special education to its supposed intellectual foundations They find a knowledge jumble constructed of bits and pieces from Piagetian psychoanalytic psychometric and behavioural theoretical models They examine the consequences of these models influence for professional and popular thinking about learning difficulty In turn they explore and critique the results of this dominance for our views about children who are different and for the development of special education and its associated professions In the light of this critique they suggest that much of the knowledge of special education is misconceived and they proceed to advance a powerful rationale for inclusion out of ideas about stakeholding social justice and human rights Concluding that inclusion owes more to political theory than to psychology or sociology the authors suggest that a rethink is needed about the ways in which we come by educational knowledge This is important reading for students of education and for teachers advisers and educational psychologists

BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved [Blairism and the War of Persuasion](#) Deborah Lynn Steinberg, Richard Johnson, 2004 Tony Blair s use of the state to impose and manage the United Kingdom s global and individual identities which not only defines New Labour but is doctrine in its own right is analyzed in this look at the Contemporary Labour Party Compared to Margaret Thatcher s market led policies driven by social authoritarianism Blairism is a political construct that persuades with hopes of social progressivism while maintaining the necessary disciplines of global capital Showing how Blairism invites trust and advocates dialogue but hollows out party democracy to pursue pre set objectives this critique clarifies Blair s agenda in order to contest its forms of passive revolution with active construction of alternatives

Education Management in Managerialist Times Martin Thrupp, Robert Willmott, 2003 For academics and students Education Management in Managerialist Times offers a critical guide to existing educational management texts and makes a strong case for redefining educational management along more socially and politically informed lines

Inside the Learning Society Stewart Ranson, 1998 This text traces the history of the learning society and discusses the different interpretive models which have been attached to the idea It provides scrutiny of the current debate sharpening our understanding of the learning society at a time of some urgency

Raising Achievement in Secondary Mathematics Anne Watson, 2006-06 This book argues for changed attitudes towards low attaining students in secondary mathematics Certain social groups regularly underachieve in mathematics so attainment is seen as an issue of social justice The way that assessment testing teaching and grouping decisions in mathematics can confirm a cycle of low attainment is carefully described with well founded arguments based on many years experience and research Anne Watson

offers an alternative view of attainment and capability based on real classroom incidents in which low attaining students show themselves to be able to think about mathematics in quite sophisticated ways She argues that teaching could be based on learners proficiency rather than seen as correcting or confirming deficits in knowledge and behaviour She describes how a group of teachers who believed that their students could do better with higher expectations developed a range of principles and strategies which supported their work the students showed significant progress and the teachers felt they were doing a better job This book is for anyone who is in a position to challenge existing practice in mathematics teaching either in their own classroom or in the broader cultures of teaching It offers the arguments the knowledge and the support for changing practice in a non judgemental practical but well founded way *Education, Research and Perspectives*, 2001 Devolution in Practice 2006 John Adams, Katie Schmueker, 2005 Education and Democracy Melissa Benn, Clyde Chitty, 2004-11-30 This collection of essays focuses on the big issues in education Many were embraced by Caroline Benn herself during her long and active life such as the concept of inclusion the campaign for comprehensive education the need to fight for educational reform alongside social justice and equality and a rejection of all attempts to pin harmful and outdated ability labels on children Contributors Jane Challice Michael Armstrong Ros George Roy Hattersley Janet Holland Max Morris Jenny Thewlis Sally Tomlinson Geoff Whitty Pat Ainley Glenn Rikowski Clyde Chitty John Clay Chris Searle Mike Cole Andy Green Maurice Plaskow *Curriculum and Ideology* Ciaran Sugrue, 2004 Through this fine collection of thoughtful analyses by international and Irish experts in education a body of work that respects and celebrates Ireland s efforts to be more caring democratic and creative in its educational goals than its English *Becoming a Teacher* Justin Dillon, Meg Maguire, 2001-07 This is a valuable book for the beginning teacher It provides a sensible blend of practical and pragmatic chapters alongside more philosophical and theoretical contributions Education Review What are the key issues that affect classroom teachers What can research tell us about schooling What are the arguments for and against specific educational issues The second edition of this highly successful text addresses these important educational questions Written for the benefit of student teachers and teachers at the beginning of their careers the book is designed to represent a coherent challenging and thoughtful set of articles that will help readers to firm up their own ideas and give a factual basis for discussion and debate New teachers need accessible readable and accurate information about educational issues They need pithy accounts of the research findings relating to particular issues and they need to be able to see how their ideas and feelings compare with those of other people Some of them will want answers to their questions others will be more interested in understanding why some questions are more important than others The book is written in a user friendly style providing ideas arguments and enough references to help those interested in following up the issues This second edition contains new chapters on school and teacher quality inspection literacy citizenship parents and schooling and social justice whilst all other chapters have been thoroughly revised and updated **The Annotations to All Sections of the Complete General Code of Ohio**

William Herbert Page,1922 **Christian evidences viewed in relation to modern thought** Charles Adolphus Row,1879

Private Education Geoffrey Walford,2006 Private schools are central to the reproduction of social inequality For example whilst in the UK providing only about seven per cent of the school population about half of the undergraduates at Oxford and Cambridge still come from the private sector Private schools have long been associated with privilege and elitism While this traditional elitist aspect to the private sector is still central the private school sector is actually far more diverse that is usually acknowledged It now includes many small schools and faith based schools that may not offer the traditional advantages of the private sector but which provide a particular environment deemed desirable by parents In spite of their educational and social importance there has been very little academic research and writing on private schools The proposed book will be the culmination of Professor Walford s research into private schools over the past twenty years

Whispering the Techniques of Language: An Mental Quest through **Affirming The Comprehensive Ideal**

In a digitally-driven earth where displays reign great and quick transmission drowns out the subtleties of language, the profound secrets and psychological subtleties hidden within phrases usually move unheard.
