Neoliberalism 2.0: Regulating and Financing Globalizing Markets L. Nijs, 2016-01-26 In today's increasingly globalized environment many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace One such consideration is the failing dynamics of the international tax infrastructure Neoliberalism 2.0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model The book considers the impact neoliberalism had and will have on regulatory infrastructure democracy in an era of globalization and reduced legitimation of the national state The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere macro economics and the political philosophical context in which law and economics emerge The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies Neoliberalism 2.0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future the implications of globalization and the changing relationship between citizens and their state

World Development Report 2017 World Bank Group, 2017-02-02 Why are carefully designed sensible policies too

often not adopted or implemented When they are why do they often fail to generate development outcomes such as security growth and equity And why do some bad policies endure World Development Report 2017 Governance and the Law addresses these fundamental questions which are at the heart of development Policy making and policy implementation do not occur in a vacuum Rather they take place in complex political and social settings in which individuals and groups with unequal power interact within changing rules as they pursue conflicting interests The process of these interactions is what this Report calls governance and the space in which these interactions take place the policy arena The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for effectiveness However who bargains who is excluded and what barriers block entry to the policy arena determine the selection and implementation of policies and consequently their impact on development outcomes Exclusion capture and clientelism are manifestations of power asymmetries that lead to failures to achieve security growth and equity The distribution of power in society is partly determined by history Yet there is room for positive change This Report reveals that governance can mitigate even overcome power asymmetries to bring about more effective policy interventions that achieve sustainable improvements in security growth and equity This happens by shifting the incentives of those with power reshaping their preferences in favor of good outcomes and taking into account the interests of previously excluded participants These changes can come about through bargains among elites and greater citizen engagement as well as by international actors supporting rules that strengthen coalitions for reform
