New Wave Manufacturing Strategies John Storey,1994-02-28 Over the past decade many companies have adopted new strategies for manufacturing which have taken their competitiveness on to new planes A whole array of initiatives such as FMS JIT TQM CIM and MRP II have been introduced This book deals with the far reaching significance of these new approaches

collectively labelled new wave manufacturing. Considerable research evidence as well as practitioners own experiences make one crucial point time and time again. The organizational as well as the human resource management aspects of these new strategies are critical to their success or failure. The underlying theme which is tackled in this book therefore is to what extent do these new operational strategies require a matching set of organizational and HR strategies. By looking at the issues through the joint eyes of production and behavioural analysts this book provides an unique introduction to the new developments in manufacturing as well as providing an up to date assessment of the organizational and HR dimensions to these methods. New Wave Manufacturing Strategies has a vision which goes beyond the new technology advanced manufacturing technology discussions. The chapters have been written in a clear accessible manner by leading experts from Europe the USA and Australia as well as from the UK.

Encyclopedia of Production and Manufacturing Management

Paul M. Swamidass, 2006-09-21. The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work. Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions. For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts: manufacturing strategy, focused factory, just in time manufacturing, concurrent engineering, total quality management, supply chain management, flexible manufacturing systems, lean production and mass customization to name a few. This explosive growth makes the need for this volume abundantly clear. The manufacturing industry thinks and acts more broadly than it did several decades ago. The most notable change has been the need for manufacturing managers to think in technological, strategic and competitive terms. This is a very favorable development and it leads to manufacturing success. The entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management. The encyclopedia consists of articles of varying lengths. The longer articles on important concepts and practices range from five to fifteen pages. There are about 100 such articles written by nearly 100 authors from around the world. In addition there are over 1000 shorter entries on concepts, practices and principles. The range of topics and depth of coverage is intended to suit both student and professional audiences. The shorter entries provide digests of unfamiliar and complicated subjects. Difficult subjects are made intelligible to the reader without oversimplification. The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness. The world of manufacturing today is increasingly competitive. It is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation. This encyclopedia has been developed to help researchers, students and those in the manufacturing industry to understand and implement these ongoing changes in the field.

Manufacturing Strategy Christopher Voss, 1992. Eighteen mostly new papers together with editorial comment by Voss. London Business School give an overview and discuss strategy formulation and implementation the international context.
