Advanced Software Design Techniques Robert J. Rader, 1978 Advanced Software Engineering: Expanding the Frontiers of Software Technology Sergio F. Ochoa, Gruia-Catalin Roman, 2006-11-30 On behalf of the Organizing Committee for this event we are glad to welcome you to IWASE 2006 the First International Workshop on Advanced Software Engineering We hope you will enjoy the traditional Chilean hospitality and of course please tell us how we can make your visit a pleasant and useful experience The goal of this Workshop is to create a new forum for researchers professionals and educators to discuss advanced software engineering topics A distinctive feature of this Workshop is its attempt to foster interactions between the Latin American software engineering community and computer scientists around the world This is an opportunity to discuss with other researchers or simply to meet new colleagues IWASE 2006 has been organized to facilitate strong interactions among those attending it and to offer ample time for discussing each paper IWASE 2006 attracted 28 submissions from 14 countries 8 of them outside Latin America Each of the 28 articles was reviewed by at least three members of the Program Committee As a result of this rigorous reviewing process 13 papers were accepted nine full papers and four work in progress papers These papers were grouped in four tracks software architecture software modeling software development process and experiences in software development *The Use of Formal Specification of Software* H.K. Berg, W.K. Giloi, 2012-12-06 The notion that program design is an engineering task alleviating the software crisis has been with us for about a decade With the recognized advantages of obeying to certain software design disciplines we are approaching the era of enforced system development standards which will ensure that end products will meet rigorous design requirements On the one hand advances in system architecture further the application of system development standards to software and firmware design and production On the other hand the growth in complexity of future system architectures in particular distributed systems with their special problems of cooperation and parallelism necessitate the use of rigorous specification and design techniques In addition to hampering the design process the lack of engineering techniques hinders research In many cases trial designs that are presented in abstract and informal terms do not force the designer to face the full problem spectrum and therefore may not sufficiently provide insight into the design process To prepare for the forthcoming discipline and to provide a snapshot view of recent advances in software and firmware engineering we organized in June of 1979 a seminar entitled *The Use of Formal Specification of Software and Firmware* The seminar took place at the Heinrich Hertz Institute Berlin and attracted over 60 participants most of them from the industry **Scientific Information Bulletin** , 1993 *NASA Technical Memorandum* , 1989 **Computerworld** , 1980-11-24 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network **Advance Papers** , 1987 Advanced
