**Multimedia Video-Based Surveillance Systems** Gian Luca Foresti, Petri Mähönen, Carlo S. Regazzoni, 2012-12-06 Multimedia surveillance systems is an emerging field that includes signal and image processing communications and computer vision Multimedia Video Based Surveillance Systems Requirements Issues and Solutions combines the most recent research results from these areas for use by engineers and end users involved in the design of surveillance systems in the fields of transportation and services The book covers emerging surveillance requirements including new digital sensors for real time acquisition of surveillance data low level image processing algorithms and event detection methods It also discusses problems related to knowledge representation in surveillance systems wireless and wired multimedia networks and a new generation of surveillance communication tools Timely information is presented on digital watermarking broadband multimedia transmission legal use of surveillance systems performance evaluation criteria and other new and emerging topics along with applications for transports and pedestrian monitoring The information contained in Multimedia Video Based Surveillance Systems Requirements Issues and Solutions bridges the distance between present practice and research findings and the book is an indispensable reference tool for professional engineers

Multisensor Surveillance Systems Gian Luca Foresti, Carlo S. Regazzoni, Pramod K. Varshney, 2003-07-31 Monitoring of public and private sites is increasingly becoming a very important and critical issue especially after the recent flurry of terrorist attacks including the one on the World Trade Center in September 2001 It is therefore imperative that effective multisensor surveillance systems be developed to protect the society from similar attacks in the future The new generation of surveillance systems to be developed have a specific requirement they must be able to automatically identify criminal and terrorist activity without sacrificing individual privacy to the extent possible Privacy laws concerning monitoring and surveillance systems vary from country to country but in general they try to protect the privacy of their citizens Monitoring and visual surveillance has numerous other applications It can be employed to help invalids or handicapped and to monitor the activities of elderly people It can be used to monitor large events such as sporting events as well Nowadays monitoring is employed in several different contexts including transport applications such as monitoring of railway stations and airports dangerous environments like nuclear facilities or traffic flows on roads and bridges The latest

generation of surveillance systems mainly rely on hybrid analog digital or completely digital video communications and processing methods and take advantage of the greater flexibility offered by video processing algorithms that are capable of focusing a human operator's attention on a set of interesting situations

**Intelligent Distributed Video Surveillance Systems** Institution of Electrical Engineers, 2006-02-14 There is a growing interest in the development and deployment of intelligent surveillance systems in public and private locations This book consists of a selection of extended versions of presentations made in two symposia on intelligent distributed surveillance systems IDSS and brings together the latest developments in the field *Video-Based Surveillance Systems* Graeme A. Jones, Nikos Paragios, Carlo S.

Regazzoni, 2012-12-06 Monitoring of public and private sites has increasingly become a very sensitive issue resulting in a patchwork of privacy laws varying from country to country though all aimed at protecting the privacy of the citizen It is important to remember however that monitoring and visual surveillance capabilities can also be employed to aid the citizen The focus of current development is primarily aimed at public and corporate safety applications including the monitoring of railway stations airports and inaccessible or dangerous environments Future research effort however has already targeted citizen oriented applications such as monitoring assistants for the aged and infirm route planning and congestion avoidance tools and a range of environmental monitoring applications The latest generation of surveillance systems has eagerly adopted recent technological developments to produce a fully digital pipeline of digital image acquisition digital data transmission and digital recording The resultant surveillance products are highly flexible capable of generating forensic quality imagery and able to exploit existing Internet and wide area network services to provide remote monitoring capability
