Advances In Child Development Behavior Volume 9:

Memory Development in Children (PLE: Memory) Peter Ornstein, 2014-05-09 Originally published in 1978 the contributors to this volume offer here chapters and position papers concerned with children's memory. The chapters represent in depth reports on children's sensory memory, rehearsal processes and organizational processes as well as treatments of constructive aspects of children's memory, the representational development hypothesis and memory in pre schoolers. The position papers address critical issues confronting researchers in memory development including the developmental implications of multistore and levels of processing models of memory as well as distinctions between semantic and episodic memory, recall and recognition and deliberate and non-deliberate aspects of children's memory. An historical overview provides an introduction to the volume leading the reader to the very latest in new directions of research in this area at the time. This volume will be of interest to all concerned with the development of memory in children. **Life-span**

Developmental Psychology Paul B. Baltes, Hayne W. Reese, John R. Nesselrode, 2014-01-02 What are the changes we see over the life span? How can we explain them? And how do we account for individual differences? This volume continues to examine these questions and to report advances in empirical research within life span development, increasing its interdisciplinary nature. The relationships between individual development, social context and historical change are salient issues discussed in this volume as are non-normative and atypical events contributing to life span change. *Child*

Development Michael Little, 2017-03-02 This book provides a good foundation for understanding influences on children's health and development. The volume brings together in a single reference source the world's leading thinkers on children's health and development. It sets out the basic concepts that underpin the study of child development and response to impairments to development including attachment, changes in brain structure and resilience. The book explores the idea of life course development, explaining how experiences at each stage in a person's life shape his or her future. It goes on to examine the relative contribution of societal, neighbourhood, school, family and individual influences to child well-being. This includes a look at the way these forces interact, such as when genes shape environments and vice versa. The book summarises the evidence on the incidence and consequences of impairments to children's health and development, covering both the majority of typical children and the minority who experience significant problems. *Books in Print*, 1994 **Life-Span**

Developmental Psychology Nancy Datan, Hayne W. Reese, 2013-09-03 *Life Span Developmental Psychology: Dialectical Perspectives on Experimental Research* is a compilation of papers that deals with the dialectical perspective focusing on the developmental process of the individual's interaction with the environment. Part 1 discusses the theoretical issues of psychological theorists such as Piaget and Kaplan. The text includes topics such as the dialectics of time and post-Newtonian metatheory for psychologists. One paper discusses the dialectic method and theory in the work of psychology as social proof structures, particularly when systems of action cause conflict with systems of thought. The text analyzes research versus

theory through the Wundt Titchener Laboratory example Another paper addresses the status of dialectics in developmental psychology using the approach of theoretical orientation versus the scientific method Part 2 presents research applications covering topics such as the phenomenological and a behavioral approach to remembering as well as remembering in empiricism Another paper addresses the dialectical perspectives of discriminative learning and transfer that includes both theory and research done on discriminative performance This book will prove valuable for psychologists behavioral therapists and researchers and students in behavioral psychology

Child Development Greta G. Fein,1978 Life Span Human Development Carol K. Sigelman,Linda De George,Kimberley Cunial,Elizabeth A. Rider,2018-09-01 The third edition of Life Span Human Development helps students gain a deeper understanding of the many interacting forces affecting development from infancy childhood adolescence and adulthood It includes local multicultural and indigenous issues and perspectives local research in development regionally relevant statistical information and National guidelines on health Taking a unique integrated topical and chronological approach each chapter focuses on a domain of development such as physical growth cognition or personality and traces developmental trends and influences in that domain from infancy to old age Within each chapter you will find sections on four life stages infancy childhood adolescence and adulthood This distinctive organisation enables students to comprehend the processes of transformation that occur in key areas of human development This text also includes a MindTap course offering with a strong suite of resources including videos and the chronological sections within the text can be easily customised to suit academic and student needs
