

A high-magnification histological micrograph of neuroblastoma tissue. The image shows a dense population of small, round, blue-stained cells with hyperchromatic nuclei and scant cytoplasm, characteristic of neuroblastoma. The cells are arranged in a disorganized pattern, with some areas showing more cellular density than others. The background is a light pinkish-purple hue, likely due to the hematoxylin and eosin (H&E) staining used in the preparation of the tissue section.

## Neuroblastoma Research Improves Treatment
