Advanced Reporting Beyond News Events:

Advanced Reporting Gerry Keir, Maxwell E. McCombs, Donald Lewis Shaw, 1991 *Advanced Reporting* Bruce Garrison, 1992 The companion book to Professional News Reporting this volume offers readers a look at advanced information gathering techniques Easy to read and well illustrated this text goes beyond a general introduction to news reporting by focusing on advanced and specialized reporting skills Filled with contemporary examples from award winning newspapers and television stations it is designed for students with a foundation in news writing To help them hone their skills it provides chapters which focus on a variety of specialized report types Mirroring numerous changes in the art and science of information gathering in the past decade this important volume provides useful strategy tips complete with recent illustrative examples The final chapter focuses on computer based reporting a must for any professional journalist and the appendix lists investigative reporting resources contributed by Orlando Sentinel reporter Jim Leusner *The Human Journalist* Jim Willis, 2003-10-30 Willis examines the many orientations and perspectives of reporters that gather and present the news of the day Debunking the notion that there are limited perspectives journalists may use Willis examines up to 15 different orientations that reporters bring to their work These perspectives run the gamut from the traditional approach of distancing oneself completely from events and people involved to becoming part of the story's fabric to ascertain the story's true essence Willis also suggests that for many stories it is wholly appropriate for journalists to feel what a non professional would experience at such an event and to allow those emotions to fuel the reporting and writing of the story Several examples are discussed in detail including the coverage of the bombing of the Alfred P Murrah Federal Building in Oklahoma City on April 19 1995 and the terrorist attacks of September 11 2001 **Computer-assisted Reporting** Bruce Garrison, 2020-07-20 Reporters in the newsroom are becoming more involved in computer assisted reporting and online news research than ever before This edition introduces readers to computer assisted reporting and to describe how leading journalists are using personal computers for news gathering in modern print broadcast and online newsrooms It provides a thorough discussion of technology and its applications to news reporting Computer Assisted Reporting focuses on the computerization of newsgathering highlighting the fact that the computer assists journalists by making writing easier and also makes gathering and organizing information more efficient As it begins the book demonstrates methods for journalists to get more from their computers such as data retrieval data analysis information storage and dissemination of that information in both processed and unprocessed forms It concludes with a refined proposal originally proposed in the first edition for five stages for development of computer literacy in the newsroom **Bad Tidings** Lynne Masel-Walters, Lee Wilkins, Tim Walters, 2018-12-07 First Published in 1993 In the 1970s a book collecting research about the mass media and their role in disasters would have been unimaginable This book then is an attempt to compile a somewhat eclectic view of research on mass communication and catastrophe The editors have attempted to provide a sampling of the most recent empirical work on

Covering the Community Leigh Stephens Aldrich, 1999-03-22 The text is suitable for all journalism courses and should be required with the AP Stylebook It would be excellent for broadcast print public relations and advertising courses alike Mini case studies clarify all these mass communication areas Faced with the challenges of fairness and balance the text will be an asset to students entering the field today Journalism and Mass communication Educator Today's reporters need to understand differences and be able to report on diverse individuals and communities accurately and sensitively This inexpensive and slim pocketbook is the perfect supplement to help your students achieve these crucial contemporary skills
