Advances in Learning Software Organizations Klaus-Dieter Althoff,Raimund L. Feldmann,Wolfgang Müller,2003-06-30 The importance of production and use of high quality software is still growing as more and more businesses depend on information technology Well educated highly skilled and experienced employees characterize the situation in most companies in the developed countries Increasingly they work together in temporary networks with geographically distributed offices Using and developing their knowledge is a key issue in gaining competitive advantages We have learned during recent years that the exchange and development of knowledge which we call learning demands a great deal of human interaction However it is widely recognized that information systems will in many cases enable the sharing of experience across distributed organizations and act as a knowledge repository A Learning Software Organization LSO will turn Intellectual Capital into market shares and profit as it establishes the means to manage its knowledge The LSO workshop series was created in 1999 to provide a communication forum that addresses the questions of organizational learning from a software point of view and builds upon existing work on Knowledge Management and Organizational Learning It aims at bringing together practitioners and researchers for an open exchange of experience with successes and failures in organizational learning Right from the beginning fostering interdisciplinary approaches and providing an opportunity to learn about new ideas has been a central issue of the workshop series The feedback that we have obtained in recent years has encouraged us to continue our work for a better understanding of the setup and running of Learning Software Organizations
