Transforming Development Practice and Environmental Stewardship Ronald James Whitmore,1998 **The Nature of Environmental Stewardship** Johnny Wei-Bing Lin,2016 Environmental issues appear deceptively simple science tells us what the problems are and how to solve them and for Christians the Bible motivates us to care for creation And yet both in society in general as well as in the Christian church in particular we cannot seem to agree on what to do regarding environmental issues In this book climate scientist Johnny Wei Bing Lin argues that determining the content of environmental stewardship far from being a straightforward exercise is a difficult and complex endeavor He sets forth a general taxonomy drawing from worldviews ethical theories science epistemology science policy studies politics and economics that can help us better understand what excellent creation care consists of and how to bridge the differences people have regarding environmental issues Dr Lin wants peace between folks who are well intentioned but unable to agree be they Christians or not Peace as we wrestle with science and Scripture over our stewardship of God s beloved creation Lin gives us well considered ways to sift competing views and supposed facts This book comes from a master teacher and irenic fellow struggler A very important synthesis of worldview driven informed arguments Terry Morrison Director Emeritus Faculty Ministry InterVarsity Christian Fellowship USA By carefully breaking environmental stewardship down into its component parts this book offers readers a framework to dialogue instead of debate the imperative of creation care Grappling with the fact that today s ecological and economic challenges cannot be contained by a simple ideology nor a single imagination Lin guides us toward both a practical synthesis of collective human wisdom and a higher level of conscientiousness in protecting all that God loves Kaleb Nyquist Steering Committee Member Young Evangelicals for Climate Action Johnny Wei Bing Lin BS

Grassroots Stewardship F Stuart Chapin III, 2020-06-03 In a society more concerned with how to cope with existential dread than how to make actionable changes to save the planet a surprisingly large number of Americans identify as environmentalists What can individual people do to lessen human impacts on the planet This is not an easy question Most research is focused on large scale changes that go beyond anything an individual can accomplish and people are left feeling defeated rather than inspired to make changes in their everyday lives Change starts at home and F Stuart Chapin III has assembled a book for people who want to learn more about global changes and more importantly what they can do about them starting today Grassroots Stewardship approaches our current situation with an educated sense of hope and positivity This book emphasizes actions by individuals rather than governmental or corporate institutions to trigger transformational change Readers will learn what they can do to most significantly transform their communities and the planet with more sustainable pathways

Nontimber Forest Products in the United States Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America s forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States

it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests
