American Historical Review Volume 96 No3:

The American Challenge R. Catley, 2017-11-28 The rise of the US as a hegemonic power during the twentieth century first pursuing a liberal project of globalization under Clinton and then moving towards greater unilateralism after the election of George W Bush is comprehensively described in this much needed study Following the invasion of Iraq the Bush administration became increasingly unpopular at home and abroad America's power to impose its will declined and rivals were able to take advantage of its weakened state and pursue their own agendas with considerable success This indispensable book looks at whether policy failure in Iraq and declining US soft and hard power mark the beginning of the end of US hegemony or whether the resilience of America's military and economic foundations will once again prove observers wrong *France, Britain and the United States in the Twentieth Century: Volume 2, 1940-1961* Andrew J. Williams, 2019-12-31 In his account of the relationship between France the UK and the US Andrew Williams successfully intertwines diplomatic history with international thought We are presented with a historical stage that includes both the doers and the thinkers of the age and as a result this is a must read for both diplomatic historians and historians of international thought The second in a multivolume study this volume takes the story beyond the fall of France into the war years the period of post war reconstruction and the Cold War As with the first volume Williams is an excellent guide stepping over the ruins of past worlds and introducing us to an epoch with more than its fair share of both visionaries and villains Yet in this second volume the stakes are higher as the United States comes to terms with its role as the paramount world power Britain faces a world that challenges its imperial order and France is picking up the pieces from its defeat Lucian Ashworth Memorial University Canada Following on from his outstanding first volume reviewing the complex interwar relationships between France Britain and the United States Williams second volume is an indispensable and lucid overview of the vitally important era of post war reconstruction From national post war developments to institutional structures and superpower shifts Williams examines clearly and engagingly the final passing of pre modern power structures and the emergence of a new Europe Amelia Hadfield University of Surrey UK divAt a time of intense debates about Europe the Anglosphere and empires old and new Andrew Williams's book is a timely demonstration that the weight of emotion in the shaping of foreign policy and its makers should not be forgotten Unearthing some of the forces profondes in diplomacy and reflecting on feelings of humiliation and liberation in national constructs Andrew Williams discusses the cultural conceptions and misconceptions that French American and British diplomats had of each other thereby revisiting the reasons why the special relationship was largely a myth but one which had tangible consequences on French and British policies in their retreat from empire By connecting the personal and the national the structural and accidental Williams offers essential insights into the major conflicts of the period and their impact on diplomatic cultures across the Atlantic M lanie Torrent Universit Picardie Jules Verne Amiens France The second volume of this study of France's unique contribution to the international relations of

the last century covers the period from the Fall of France in 1940 to Charles de Gaulle's triumphant return to power in the late 1950s. France had gone from being a victorious member of the coalition with Britain and the United States that won the First World War to a defeated nation in a few short weeks. France then experienced the humiliation of collaboration with and occupation by the enemy, followed by resistance and liberation and a slow return to global influence over the next twenty years. This volume examines how these processes played out by concentrating on France's relations with Britain and the United States, most importantly over questions of post-war order, the integration of Europe and the withdrawal from Empire.

Report of the Johns Hopkins University Johns Hopkins University, 1959 **The Hispanic American Historical Review**
James Alexander Robertson, 1920. Includes Bibliographical section Being American on the Edge J. Goddard, 2012-08-06
This manuscript focuses on the development of hybrid city/country/penurban landscapes around large urban areas which mesh stylized countryside with functional links to the cities. These landscapes are central to American mindsets as they combine the dreams, expectations, and experiences of the nation in expressive cultural landscapes. An interpretive analytical methodology is used in this single-authored multidisciplinary work which draws on insights from history, American Studies, social sciences, urban studies, and environmental studies and cultural studies in order to portray lifestyle and settlement phenomena overlooked by single disciplinary fields. Telling the story of how penurban landscapes emerged, the work blends original research with a re-reading of existing work to understand developing lifestyle and settlement patterns. The book aims at readers in history, urban studies, environmental studies, consumerism, and American Studies. **Report of the President of the Johns Hopkins University, Baltimore, Maryland** Johns Hopkins University, 1957 Evangelical Violence
Christopher Rhodes, 2026-02-13. *Evangelical Violence* examines the long history of western states and actors attempting to export and impose Christianity on non-western peoples and the use of state-administered violence to achieve these Evangelical goals. This book explores the theological underpinnings of western attempts to spread Christianity and examines how variations in the interpretation of this theological imperative have impacted beliefs and practices of western states. The book argues that throughout the past millennium, the foreign policy of western states has been heavily influenced by the Christian concept of evangelism based on the scriptural Great Commission, the command to go and make disciples of all nations. When evangelism has been conceived in collective rather than individualistic terms, an extension of the concept of Christian Nationalism to international relations, violence has been readily and more intensely used against non-Christian societies to achieve both conversion and secular goals, whereas a more individualistic understanding of conversion has constrained violence and promoted persuasive and humanitarian-focused outreach. The book analyzes the relationship between prevailing western concepts of evangelism and the use of force against non-western societies through a series of case studies that include the Crusades, the first and second waves of western colonization of the Americas, Africa, and Asia, westward expansion of the United States, and modern examples of international interventionism. This book will appeal to

students and scholars interested in Christian nationalism colonialism the history of international relations and the intersection of religion and politics
