

# HENRY HUDSON

Henry Hudson was born in England around the year 1570. As a young man in his teens, Henry worked as a cabin boy, recording accounts for the ship's captain and writing on passengers and crew members. He worked his way up to captain, learning how to cook, sail, navigate, and read weather maps. As a captain, he was responsible for keeping a journal, an old-fashioned belief he was able to read and write.

Most of what we know about Henry Hudson's life came from his own journals and written records kept by his crew members during their four voyages with Henry Hudson.

## HENRY HUDSON'S FIRST VOYAGE

In 1607, Henry Hudson sailed from England on the captain of his own ship, the *Halibout*. He was trying to find a water route to Asia through the North Pole. Sometimes, finding a safe route to Asia was very important for Spain, France, and England. In Asia, they could buy jewels, silk, and spices that were not available in Europe.

Hudson wanted to be the first explorer to find the important route to Asia.

During Hudson's first voyage, he sailed northwest from England along the coast of Greenland. He was only 200 miles from the North Pole. He did not find the passage to Asia. He did, however, sail farther north than any other explorer before him. He also discovered seals, walrus, and pods of whales on Spitzbergen Island in the Arctic Ocean.

This discovery would be important to English whale business in later years. In fact, Henry Hudson is often remembered as the grandfather of the whaling industry.
