Low-Moisture Foods Richard Podolak,Darryl G. Black,2017-07-12 The first and only comprehensive reference solutions manual for managing food safety in low moisture foods The first book devoted to an increasingly critical public health issue Control of Salmonella and Other Bacterial Pathogens in Low Moisture Foods reviews the current state of the science on the prevalence and persistence of bacterial pathogens in low moisture foods and describes proven techniques for preventing food contamination for manufacturers who produce those foods Many pathogens such as Salmonella due to their enhanced thermal resistance in dry environments can survive the drying process and may persist for prolonged periods in low moisture foods especially when stored in refrigerated environments Bacterial contamination of low moisture foods such as peanut butter present a vexing challenge to food safety and especially now in the wake of widely publicized food safety related events food processors urgently need up to date practical information on proven measures for containing the risk of contamination While much has been written on the subject until now it was scattered throughout the world literature in scientific and industry journals The need for a comprehensive treatment of the subject has never been greater and now this book satisfies that need Discusses a wide variety of foods and evaluates multiple processing platforms from the standpoint of process validation of all food safety objectives for finished food products Takes a practical approach integrating the latest scientific and technological advances in a handy working resource Presents all known sources and risk factors for pathogenic bacteria of concern in the manufacturing environment for low moisture water activity products Characterizes the persistence and thermal resistance of bacterial pathogens in both the environment and most low moisture food products Control of Salmonella and Other Bacterial Pathogens in Low Moisture Foods is a much needed resource for food microbiologists and food industry scientists as well as managers and executives in companies that produce and use low moisture foods It also belongs on the reference shelves of food safety regulatory agencies worldwide *Chemical Engineer* ,1910 **Chemical Technology, Or, Chemistry in Its Applications to Arts and Manufactures: Electric lighting** Charles Edward Groves,William Thorp,Thomas Richardson,Edmund Ronalds,Henry Watts,1903 **Sustainable Crop Protection under Protected Cultivation** P. Parvatha Reddy,2016-01-07 This book focuses on pests insect and mite and diseases fungal bacterial viral and nematode in protected horticulture fruits vegetables and ornamentals using physical cultural chemical

biological host resistance and integrated methods It opens with chapters describing the setting in which integrated pest and disease control operates i e the greenhouse and its environment Subsequent chapters present the basic strategies and tactics of different control methods including integrated control with special reference to greenhouse crops Further chapters include the different facets of biological pest and disease control its scientific bases its development in practice its commercialization and quality control The concluding chapters of the book highlight the present status of integrated pest and disease control for the most important greenhouse crops fruits vegetables and flower crops worldwide The book s final chapter explores future challenges for researchers assigned to identify non pesticide methods and integrate sustainable pest management technologies that can contribute to increased productivity such as breeding for durable resistance biological control and devising integrated methods that will have minimal adverse environmental and social impacts Among productivity enhancing technologies protected cultivation has a tremendous potential to increase the yield of vegetables and flower crops by several fold Pests and diseases are one of the major challenges to protected cultivation Year round warm temperatures and relatively high humidity together with abundant food make the protected environment of greenhouses highly attractive to pests and diseases Nevertheless very little attention has been paid to the manipulation of greenhouse environments expressly to avoid disease epidemics and insect infestations which together can easily account for 30% of crop losses This book will be of immense value to all members of the scientific community involved in teaching research and extension activities on protected horticulture It also offers a useful reference guide for policymakers and practicing farmers and can be used as a textbook for postgraduate courses

The Analysis, Communication, and Perception of Risk B.John Garrick,Willard C. Gekler,2013-11-11 The 1989 Annual Meeting of the Society for Risk Analysis dramatically demonstrated one of the most important reasons for having the Society to bring together people with highly diverse backgrounds and disciplines to assess the common problems of societal and individual risks The physical scientists emphasized the analytical tools for assessing environmental effects and for modeling risks from engineered systems and other human activities The health scientists presented numerous methods of analyzing health effects including the subject of dose response relationships especially at low exposure levels never an easy analysis The social and political scientists concentrated on issues of risk perception communication acceptability and human touch Others discussed such issues as cost benefit analysis and the risk based approach to decision analysis Use of risk assessment methods for risk management continued to be a matter of strong opinion and debate The impacts of state and federal regulations existing and planned were assessed in sessions and in luncheon speeches These impacts show that risk analysis practitioners will have an increasingly important role in the future They will be challenged to provide clear easily understood evaluations of risk that are responsive to society s concern for risk as evidenced in laws and regulations Of course the various risk analysis specialties overlapped in domains of interest
