Labyrinths Of Information:

The Labyrinths of Information Claudio Ciborra, 2004-09-23 How to use information and communication technologies in organizations and how to manage their impact has been the traditional domain of computer specialists and management consultants The former have offered multiple ways to represent model and build applications that would streamline and accelerate data flows while the latter have been busy linking the deployment of ICTs with strategy and the redesign of business processes This book takes quite a different approach altogether In a series of essays Ciborra uses a string of metaphors such as Bricolage Krisis Gestell etc to place a concern for human existence and our working lives at the centre of the study of ICTs and their diffusion in business organizations and looks at our practices improvisations and moods He draws upon his own extensive research and consulting experience to throw a fresh light on some key questions why are systems ambiguous Why do they not give us more time to do things Is there strategic value in tinkering even in high tech settings What is the value of age old practices in dealing with new technologies What is the role of moods and affections in influencing action and cognition Labyrinths of Information presents an alternative to the current approaches in management software engineering and strategy that will be of interest to all those concerned with the deployment of ICTs in society today whether as users managers designers policy makers or the merely curious *The Labyrinths of Information* Claudio Ciborra, 2007

Celebrating the Labyrinth Gailand MacQueen, 2021-04-05 Labyrinths and labyrinthine borders have been around for a very long time In fact they have been used outside of formal religion as a ritual object to express spiritual values for at least 3500 years in countries all over the world including China India the Holy Land Ireland Southern Europe Scandinavia pre Columbian America and England They can be found at Neolithic and Sardinian and Hopi rock art sites in Hindu temples and Taoist shrines bordering Minoan frescoes and in Roman mosaics They have been incorporated into Roman Catholic and Episcopal cathedrals Protestant churches and in New Age retreat centres They have been carved into rocks turf and wood engraved in metal laid out in stones woven in reeds set in tiles painted and drawn In

other words the labyrinth is a nearly universal form and comes as close as we can to an archetype An archetype is a symbol that appeals to us at an unconscious level We don't have to struggle with its meaning intellectually Its symbolic meaning is somehow ingrained in us part of our very nature As a result it may appeal to us without our even understanding why It is always risky to talk about the meaning of such an archetypal symbol We know that it must carry a wealth of meaning to appeal to so many different sorts of people over such a long stretch of time But we can tentatively explore some of its meanings if we stay aware that we can never really plumb all of its riches
