*The Blind Watchmaker* Richard Dawkins, 1996 Reprint of the 1987 original with a new introduction and preface  
Annotation copyrighted by Book News Inc Portland OR **The Blind Watchmaker** Richard Dawkins, 1987 Intelligent Design Creationism and Its Critics Robert T. Pennock, 2001-12-21 The last decade saw the arrival of a new player in the creation evolution debate the intelligent design creationism IDC movement whose strategy is to act as the wedge to overturn Darwinism and scientific naturalism This anthology of writings by prominent creationists and their critics focuses on what is novel about the new movement It serves as a companion to Robert Pennock s Tower of Babel in which he criticizes the wedge movement as well as other new varieties of creationism The book contains articles previously published in specialized hard to find journals as well as new contributions Each section contains introductory background information articles by influential creationists and their critics and in some cases responses by the creationists The discussions cover IDC as a political movement IDC s philosophical attack on evolution the theological debate over the apparent conflict between evolution and the Bible IDC s scientific claims and philosopher Alvin Plantinga s critique of naturalism and evolution The book concludes with Pennock s Why Creationism Should Not Be Taught in the Public Schools Memory, Amnesia, and the Hippocampal System Neal J. Cohen, Howard Eichenbaum, 1993 In this sweeping synthesis Neal J Cohen and Howard Eichenbaum bring together converging findings from neuropsychology neuroscience and cognitive science that provide the critical clues and constraints for developing a more comprehensive understanding of memory Specifically they offer a cognitive neuroscience theory of memory that accounts for the nature of memory impairment exhibited in human amnesia and animal models of amnesia that specifies the functional role played by the hippocampal system in memory and that provides further understanding of the componential structure of memory The authors central thesis is that the hippocampal system mediates a capacity for declarative memory the kind of memory that in humans supports conscious recollection and the explicit and flexible expression of memories They argue that this capacity emerges from a representation of critical relations among items in memory and that such a relational representation supports the ability to make inferences and generalizations from memory and to manipulate and flexibly express memory in countless ways In articulating such a description of the fundamental nature of declarative representation and of the mnemonic capabilities to which it gives rise the authors theory constitutes a major extension and elaboration of the earlier procedural declarative account of memory Support for this view is taken from a variety of experimental studies of amnesia in humans nonhuman primates and rodents Additional support is drawn from observations concerning the neuroanatomy and neurophysiology of the hippocampal system The data taken from divergent literatures are shown to converge on the central theme of hippocampal involvement in declarative memory across species and across behavioral paradigms **Dawkins' God** Alister E. **Revelation, Rationality, Knowledge & Truth** Hazrat Mirza Tahir Ahmad, 1998-06-30 Any divide between revelation and rationality religion and logic has to be irrational If religion and rationality cannot proceed hand in hand there has to be something deeply wrong with either of the two Does revelation play any vital role in human affairs Is not rationality sufficient to guide man in all the problems which confront him Numerous questions such as these are examined with minute attention All major issues which intrigue the modern mind are attempted to be incorporated in this fascinatingly comprehensive statute Whatever the intellectual or educational background of the reader this book is bound to offer him something of his interest It examines a very diverse and wide range of subjects including the concept of revelation in different religions history of philosophy cosmology extraterrestrial life the future of life on earth natural selection and its role in evolution It also elaborately discusses the advent of the Messiah or other universal reformers awaited by different religions Likewise many other topical issues which have been agitating the human mind since time immemorial are also incorporated The main emphasis is on the ability of the Quran to correctly discuss all important events of the past present and future from the beginning of the universe to its ultimate end Aided by strong incontrovertible logic and scientific evidence the Quran does not shy away from presenting itself to the merciless scrutiny of rationality It will be hard to find a reader whose queries are not satisfactorily answered We hope that most readers will testify that this will always stand out as a book among books perhaps the greatest literary achievement of this century
