The Last American in Damascus Thomas L Webber,2020-05-25 For the first time in my life I was shot at as I approached the Beirut shore I know now that if they wanted to kill me they could have that night This is just one of the many adventures the author has faced during his 44 years of living and working in the volatile Middle East As the famous writer and lecturer Helen Keller once wrote Life is a daring adventure or it is nothing at all In the author s own lifetime he has experienced a profuse number of adventures and many were truly amazing life changing episodes in fact so many that he has decided to share them by writing his third book The Last American in Damascus Iran and The West Cyrus Ghani,2013-09-05 First Published in 1987 this volume offers a bibliography of biographies autobiographies and books on contemporary politics by prominent 20th century figures on the topic of Iran Al-Karaji Susan Nichols,2016-07-15 Tenth century mathematician al Karaji is best known for his writings on algebra and for freeing algebra from geometry The scholar spent most of his life in Baghdad where he established a school for algebra and served as a vizier for the Abbasid government Al Karaji also was an accomplished engineer who wrote extensively on water extraction Many of his hydrological ideas are still used in the Middle East today While some modern scholars question his originality others maintain he was an important transition between ancient mathematics and modern algebra **Subterranean Fishes of the World** Graham S. Proudlove,2006 Blind White Fish in Persia. Persisk Hägring. Med 16 Planscher. (Til Svenska Av Ingrid Ekman Nordgaard.) Anthony John Francis SMITH,Ingrid Ekman NORDGAARD,1954 Insignificant but Special Bruce Sanford,2023-01-13 Life is a rarity We know of no other planet where life exists other than on Earth Life started out in a most simple form then proceeded along a labyrinth of evolutionary pathways that resulted in extraordinary and unfathomable designs This is a journey from the beginning of time to this very day guided by circumstances contingencies and chaos that has governed Earth s living assemblage But life s presence was not destined to just happen If it wasn t for our moon which gave Earth orbital and rotational stability life would not be as we know it today If it wasn t for volcanic eruptions Earth would be an ice clad frozen globe If it wasn t for one of the tiniest of living organisms that produced a toxic gas complex life would not have arisen If it wasn t for one particular extinction event Homo sapiens would not be walking this planet and you would not be reading this now If it wasn t for a million other things life would be much different or not at all Earth made life from the meek to the monstrous from the banal to the bizarre from the humblest to the haughtiest Strap yourself in alongside a window seat and witness the passing of time to view the episodes of change and how the making of life became the greatest story on Earth Bibliography of Natural History Travel Narratives Anne S. Troelstra,2017-06-01 Anne Troelstra s fine bibliography is an outstanding and ground

breaking work He has provided the academic world with a long needed bibliographical record of human endeavour in the field of the natural sciences The travel narratives listed here encompass all aspects of the natural world in every part of the globe but are especially concerned with its fauna flora and fossil remains Such eyewitness accounts have always fascinated their readers but they were never written solely for entertainment fragmentary though they often are these narratives of travel and exploration are of immense importance for our scientific understanding of life on earth providing us with a window on an ever changing and often vanishing natural world Without such records of the past we could not track document or understand the significance of changes that are so important for the study of zoogeography With this book Troelstra gives us a superb overview of natural history travel narratives The well over four thousand detailed entries ranging over four centuries and all major western European languages are drawn from a wide range of sources and include both printed books and periodical contributions While no subject bibliography by a single author can attain absolute completeness Troelstra s work is comprehensive to a truly remarkable degree The entries are arranged alphabetically by author and chronologically by the year of first publication under the author s name A brief biography with the scope and range of their work is given for each author every title is set in context the contents including illustrations are described and all known editions and translations are cited In addition there is a geographical index that cross refers between authors and the regions visited and a full list of the bibliographical and biographical sources used in compiling the bibliography
