The Emu, 1910 **Australian Bird Names** Ian Fraser, Jeannie Gray, 2019-09-02 This second edition of Australian Bird Names is a completely updated checklist of Australian birds and the meanings behind their common and scientific names which may be useful, useless or downright misleading. For each species the authors examine the many and varied common names and full scientific name with derivation, translation and a guide to pronunciation. Stories behind the name are included as well as relevant aspects of biology, conservation and history. Original descriptions translated by the authors have been sourced for many species. As well as being a book about names, this is a book about the history of the ever-developing understanding of birds, about the people who contributed to this understanding and most of all about the birds themselves. This second edition has been revised to follow current taxonomy and understanding of the relationships between families, genera and species. It contains new taxa, updated text and new vagrants and will be interesting reading for anyone with a love of birds, words or the history of Australian biology and bird watching. Birds Judith Wright, 2003 The poems are complemented by full colour illustrations drawn from the National Library's Pictures Collection featuring the work of artists such as John Lewin, Lionel Lindsay, Lilian Medland, William T Cooper and Betty Temple Watts. Australian Bird Names Jeannie Gray, Ian Fraser, 2013-05-15 Australian Bird Names is aimed at anyone with an interest in birds, words or the history of Australian biology and bird watching. It discusses common and scientific names of every Australian bird to tease out the meanings which may be useful, useless or downright misleading. The authors examine every species, its often many and varied common names, its full scientific name with derivation, translation and a guide to pronunciation. Stories behind the name are included as well as relevant aspects of biology, conservation and history. Original descriptions translated by the authors have been sourced for many species. As well as being a book about names, this is a book about the history of ever-developing understandings of birds, about the people who contributed and most of all about the birds themselves. 2013 Whitley Award Commendation for Zoological Resource The Birds of Australia Arthur Henry Shakespeare Lucas, William Henry Dudley Le Souëf, 1911 A List of the Birds of Australia Gregory Macalister Mathews, 1913 Strict application of law of priority and use of trinomials necessitated many changes in nomenclature; this list brings together those made up to 1913. Indigenous Engineering for an Enduring Culture Cat Kutay, Elysebeth Leigh, Juliana Kaya Prpic, Lyndon Ormond-Parker, 2022-09-28 For many millennia Indigenous Australians have been engineering the landscape using sophisticated technological and philosophical knowledge systems in a deliberate response to changing social and environmental circumstances. These knowledge systems integrate profound understanding of country and bring together knowledge of the topography and geology of the landscape, its natural cycles and ecological systems, its hydrological systems and natural resources including fauna and flora. This enables people to manage resources sustainably and reliably and testifies to a developed contextualised knowledge system and to a society with agency and the capability to maintain and refine accumulated knowledge and

material processes This book is a recognition and acknowledgement of the ingenuity of Indigenous engineering which is grounded in philosophical principles values and practices that emphasise sustainability reciprocity respect and diversity and often presents a much needed challenge to a Western engineering worldview Each chapter is written by a team of authors combining Indigenous knowledge skills and academic expertise providing examples of collaboration at the intersection of Western and Indigenous engineering principles sharing old and new knowledges and skills These varied approaches demonstrate ways to integrate Indigenous knowledges into the curricula for Australian engineering degrees in line with the Australian Council of Engineering Deans Position Statement on Embedding Aboriginal and Torres Strait Islander perspectives into the engineering curriculum first published in 2017
