Pioneers, Passionate Ladies, and Private Eyes Larry E Sullivan, Lydia C Schurman, 2013-02-01 Despite efforts of contemporary reformers to curb the availability of dime novels series books and paperbacks *Pioneers Passionate Ladies and Private Eyes* reveals how many readers used them as means of resistance and how fictional characters became models for self empowerment These literary genres whose value has long been underestimated provide fascinating insight into the formation of American popular culture and identity Through these mass produced widely read books Deadwood Dick Old Sleuth and Jessie James became popular heroes that fed the public s imagination for the last western frontier detective tales and the myth of the outlaw Women particularly those who were poor and endured hard lives used the literature as means of escape from the social economic and cultural suppression they experienced in the nineteenth century In addition to the insight this book provides into texts such as *The Bride of the Tomb* the Nick Carter Series and Edward Stratemeyer s rendition of the Lizzie Borden case readers will find interesting information about the roles of illustrations and covers in consumer culture Bowling Green s endeavor to digitize paperback and pulp magazine covers bibliographical problems in collecting and controlling series books the effects of mass market fiction on young girls Louisa May Alcott s pseudonym and authorship of three dime novels special collections competition among publishers A collection of work presented at a symposium held by the Library of Congress *Pioneers Passionate Ladies and Private Eyes* makes an outstanding contribution to redefining the role of popular fiction in American life **Forthcoming Books** Rose Army, 1989-09 **Mobility of Health Professionals** Frits Tjadens, Caren Weilandt, Josef Eckert, 2012-11-28 This book on mobility of health professionals reviews analyses and summarises published information and data as well as collected interview data from stake holders including politicians policy makers health service managers and migrant health workers It is based on the research carried out under the umbrella of the EU funded project *Mobility of Health Professionals MoHProf* The partners involved in the *MoHProf* project gathered evidence from 25 countries around basic questions and knowledge gaps relating to the international migration of health professionals which involved an analysis of migration flows and evaluation of policies addressing migration This book provides a comprehensive description and analysis of the mobility streams the motives and driving forces behind them and the impact on and challenges for health systems and draws conclusions and provides recommendations for future strategic planning monitoring and the management of mobility of health professionals as well as further research and policy development needs **Shattered Innocence** Christine Dolan, 2024-07-16 A book that will change your view on the transnationally and transcriminality of slavery in plain sight in the 21st Century and how it is increasing exponentially Christine Dolan is a real investigative journalist who first stepped into the world of human trafficking in 2000 How old are the victims Christine asked a London cop in 2000 His answer changed the trajectory of her life infants When she dug deeper and walked through the doors of evil she realized what she was up against but boldly faced

that evil no matter where the facts took her She concluded evil is among us but if we look out of ourselves we can see it to protect the most vulnerable the children and those marginalized and those whose eyes are shut This investigation also altered her life on she viewed conservatives and liberals those who professed to protect children advocate for human rights and those with twisted narratives to normalize and embed evil within the threads of civilized society It also transformed her faith in God Slavery never died but morphed into a new model defined by technology along with centuries lust of greed and power and has redefined slavery in the 21st Century Shattered Innocence A Shared Global Shame brings the reader through a journey Dolan walked that opened her eyes and will open yours The readers will grasp the depth and breadth of evil all the while negating the faces of humanity

Hitler Strikes North Jack Greene, Alessandro Missignani, 2013-03-19 A detailed account of Germany's groundbreaking Operation Weserbung the first three dimensional land sea air strategic invasion in history The German invasion of Denmark and Norway in April 1940 brought a sudden and shocking end to the Phoney War in the West In a single day multiple seaborne and airborne landings established German forces ashore in Norway overwhelming the unprepared Norwegian forces and catching the Allied Powers completely by surprise Their belated response was ill thought out and badly organized and by June 9 all resistance had formally ended The strategic importance of Scandinavian iron ore shipped through the port of Narvik to Germany was the main cause of the campaign The authors show how Allied attempts to interdict these supplies provoked German plans to secure them and also how political developments in the inter war years resulted in both Denmark and Norway being unable to deter threats to their neutrality despite having done so successfully in the First World War The German attack was their first joint air sea and land operation making large scale use of air landing and parachute forces and the Luftwaffe's control of the air throughout the campaign would prove decisive Although costly particularly for the Kriegsmarine it was a triumph of good planning improvisation and aggressive determined action by the troops on the ground Making full use of Norwegian Danish and German sources this book is a full and fascinating account of this highly significant campaign and its aftermath both for the course of the Second World War and the post war history of the two countries conquered with such unprecedented speed

Social Mobility in Europe Richard Breen, 2004-11-25 Social Mobility in Europe is the most comprehensive study to date of trends in intergenerational social mobility It uses data from 11 European countries covering the last 30 years of the twentieth century to analyze differences between countries and changes through time The findings call into question several long standing views about social mobility We find a growing similarity between countries in their class structures and rates of absolute mobility in other words the countries of Europe are now more alike in their flows between class origins and destinations than they were thirty years ago However differences between countries in social fluidity that is the relative chances between people of different class origins of being found in given class destinations show no reduction and so there is no evidence supporting theories of modernization which predict such convergence Our results also contradict the long standing Featherman Jones Hauser hypothesis of a basic

similarity in social fluidity in all industrial societies with a market economy and a nuclear family system There are considerable differences between countries like Israel and Sweden where societal openness is very marked and Italy France and Germany where social fluidity rates are low Similarly there is a substantial difference between for example the Netherlands in the 1970s which was quite closed and in the 1990s when it ranks among the most open societies Mobility tables reflect many underlying processes and this makes it difficult to explain mobility and fluidity or to provide policy prescriptions Nevertheless those countries in which fluidity increased over the last decades of the twentieth century had not only succeeded in reducing class inequalities in educational attainment but had also restricted the degree to which among people with the same level of education class background affected their chances of gaining access to better class destinations
