Street Scenes Nicolas Whybrow,2005 Always the focal point in modern times for momentous political social and cultural upheaval Berlin has continued since the fall of the Wall in 1989 to be a city in transition As the new capital of a reunified Germany it has embarked on a journey of rapid reconfiguration involving issues of memory nationhood and ownership Bertolt Brecht meanwhile stands as one of the principal thinkers about art and politics in the 20th century The Street Scene model which was the foundation for his theory of an epic theatre relied precisely on establishing a connection between art's functioning and everyday life His preoccupation with the ceaselessness of change an impulse implying rupture and movement as the key characteristics informing the development of a democratic cultural identity correlates resonantly with the notion of an ever evolving city Premised on an understanding of performance as the articulation of movement in space Street Scenes interrogates what kind of life is permitted to flow in the new Berlin Central to this method is the flaneur figure a walker of streets who provides detached observations on the revealing detritus of modern urban existence Walter Benjamin himself a native of Berlin as well as friend and seminal critic of Brecht exercised the practice in exemplary form in his portrait of the city One Way Street Street Scenes offers various points of entry for the reader including those interested in theatre performance visual art architecture theories of everyday life and culture and the politics of identity Ultimately it is an interdisciplinary book which strives to establish the porosity of areas of theory and practice rather than hard boundaries

New and Enlarged Edition Sir George Charles D'Aguilar,1843 *The NCO Guide* Dan Cragg,1982 France and the Visual Arts Since 1945 Catherine Dossin,2019-01-01 Taking on the myth of France's creative exhaustion following World War II this collection of essays brings together an international team of scholars whose research offers English readers a rich and complex overview of the place of France and French artists in the visual arts since 1945 Addressing a wide range of artistic practices spanning over seven

decades and using different methodologies their contributions cover ground charted and unknown They introduce greater depth and specificity to familiar artists and movements such as Lettrism Situationist International or Nouveau Réalisme while bringing to the fore lesser known artists and groups including GRAPUS the Sociological Art Collective and Nicolas Schffer Collectively they stress the political dimensions and social ambitions of the art produced in France at the time deconstruct the traditional geography of the French art world and highlight the multiculturalism of the French art scene that resulted from its colonial past and the constant flux of artistic travels and migrations Ultimately the book contributes to a story of postwar art in which France can be inscribed not as a main or sub chapter but rather as a vector in the wider constellation of modern and contemporary art
